YOEMEN TO OPEN SEASON FRIDAY

Charles Henry (Petie) Coffield Will Be The Nation's Number One Host Saturday As 2000 Boy Scouts Gather At Coffield Ranch Near Sharp

History will be made for outdoor entertainment Saturday, September 14 when Charles Henry (Petie) Coffield plays host to some 2000 Boy Scouts and hundreds of other guests.

This will be the first celebration of its kind ever held in Texas if not in the nation and 12 year old Petie Coffield, son of Mr. and Mrs. H. H. Coffield of Rockdale, is the youngest host ever to greet such a throng of guests and to have a part in the direction of such an event.

Saturday will be a day long remembered for Boy Scouts and Scouters of Section A, Heart O Texas council. Petie Coffield the host is a member of Troop 88 in Rockdale.

The program in the main will feature a free barbecue and rodeo. In detail the program is to be one of the most interesting ever held in Texas. The celebration gets under way at 1 p. m. and ends at 10 p. m.

The celebration is strictly an invitation affair and none will be admited without the approved invitation card.

In addition to the Scouts from Section A, Heart O' Texas Council, special guest troops from other sections of the State will be on hand.

"THE HOST"

The entertainment is to be staged at the Coffield Ranch near Sharp, touching two miles of the winding banks of Little River. The ranch is a modern retreat built by H. H. Coffield and perhaps the most likely spot in Texas to stage a program of this kind. Chas. F. Rutledge, Assistant Scout Executive, has mailed invitations in letter for the Scouts of the District and instructions to reach the Coffield Ranch in the hands of all Scoutmasters.

The magnitude of the program which has been planned by Mr. Coffield, super host, whose hospitality has been enjoyed on many occa-

STASA GIN PLANT AT PETTIBONE BURNED

Fire at 2 a. m. Wednesday totally destroyed the John Stasa gin plant at Pettibone, 5 miles west of Cameron on highway 36.

Cameron firemen were summoned but were unable to save the plant because no water was available for fighting the fire.

According to information reaching the Daily Herald Mrs. Stasa was awakened around 1:30 a. m. by a Santa Fe train passing near the Stasa residence across the highway from the gin plant. Mrs. Stasa said that her attention was attracted to the fire when she discovered that the yard of her home was lighted up by the flames.

The gin plant is located about 100 yards from the Stasa residence. It is believed that the fire started from electric wiring in the gin or from some cause yet undetermined.

The plant, one of the most modern in this section of the county, was totally destroyed. The loss is partially covered by insurance.

The plant was built seven years ago and due to its location was well patronized by adjacent farmers.

Former Negro Convict Held After Burglary Of Rural Home

Burglary charges have been field here against Albert Punchard, negro who entered the home of Gustav Heinz, 6 miles north of Cameron Sunday afternoon.

The negro, according to Deputy Sheriff, C. D. McCall, was recently released from the State prison at Huntsville. He took an overcoat, radio and suit case from the Heinz home.

Punchard lives in Caldwell and was arrested there Sunday by Sheriff Clint Lewis after he had hijacked a garage worker who came out on the highway in response to a phone call from Punchard whose car was stalled.

As the wrecker pulled into Caldwell with the machine the negro after paying the garage man $2 for the job, took the money and escaped.

The negro now in the Caldwell jail, will be returned here to face charges.

WILSON-BROWN

Sellar (Dick) Wilson and Miss Letha Brown were married Saturday night by Judge Jeff T. Kemp at the Kemp residence. Mr. Wilson is a resident of the San Gabriel community where the couple will make their home.

Mrs. George McGehee, Miss Mary Burns and Mrs. Pearl Clement spent Monday visiting in Waco.

FORMER HIGHWAY PATROLMAN IS DEAD

D. A. McGonagill, 33, highway patrolman, formerly stationed in Cameron, was killed at 6 p. m. Wednesday as he rode his motorcycle along the highway, 3 miles east of Lockney.

McGonagill and Patrolman Tom Majors were returning to Plainview through a slow rain. Majors said he heard the lightning strike, looked back and saw McGonagill go into a ditch.

McGonagill had been stationed in Plainview since February and had been in the service two years.

Funeral services were held Friday at 3 p. m. in Marathon, home of his parents.

McGonagill was well known in Milam county. He entered the service shortly before being transfered to this city. Hundreds here were shocked and grief stricken over his death.

During his August vacation period McGonagill came to Cameron for a visit with old friends.

In the court house here offficials expressed deep sorrow over the young officer and recalled with appreciation his work here as a patrolman.

ELEVEN INDICTMENTS RETURNED BY JURY

Eleven indictments were returned here late Thursday by the Grand Jury in District Court after 4 days deliberation.

Following is the list of indictments:

Willie Paul Sanders, three charges: cattle theft, bond set at $500; theft of hog, bond set at $300; theft of hog, bond set at $500. Trial set for September 11.

Earl Brandenberg, three charges: chicken theft, bond set at $250; chicken theft, bond set at $250, chicken theft, bond set at $250. Trial set for September 11.

Marcelina Cassasias, chicken theft, bond set at $250. Trial set for September 11.

J. L. DuBose, charged with driving an automobile while intoxicated. Bond set at $500. No date set for trial.

Booker T. Washington, charged with arson, bonds set at $500. No date set for trial.

Carl Merkord, charged with driving while intoxicated. Bond set at $500. Trial set for Sept. 11.

Charley Clampet, charged with burglary of a private residence at night. Bond set at $1,000. No date set for trial.

NEW SHARP SCHOOL DEDICATED SUNDAY

Dedication of Sharp's new high school building was the featured event on the eve of the 1940 school term.

The program was held at 3 p. m. Sunday, September 8, in the auditorium of the new building, opening with a concert by the Cameron band for 30 minutes preceding the invocation.

The local school board was introduced by C. E. Bartlett, President. The audience sang "God Bless America," directed by Miss Nell Parmley, of the State Department of Education.

A piano solo by Mrs. Noel Wood continued the musical program.

J. E. Johnson, architect, delivered the building to the board in a short talk and this was followed by a vocal solo from Miss Nell Parmley.

E. A. Camp, Mayor of Rockdale delivered an address and this was followed by introduction of platform guests.

Judge Graham Gillis made a talk and this was followed by a song in which the audience joined.

The dedicatory address was delivered by L. A. Wood, State Superintendent of Public Education.

Fifteen hundred people witnessed the dedication ceremonies. There were a large number of out of county visitors.

RAY O'NEILL LEADS RED CROSS ROLL CALL

Ray O'Neill has been named roll call chairman of Milam County for the 24th annual Red Cross membership drive.

"Not since 1918" says Mr. O'Neill, "has a Red Cross roll call assumed more importance to the American people than the coming drive for membership. Now, more than ever, it is the duty of every patriotic citizen of Milam County to join and do his bit for humanity."

Milam County's quota has been set at 900 members and it is felt that Mr. O'Neill will perfect an organization of chairmen and workers that will even exceed this goal.

Other roll call officers named Thursday by the Red Cross area supervisor were W. H. Stafford, Cameron, Assistant roll call chairman; T. V. Adams, Buckholts, treasurer; R. W. Hester, Cameron, roll call publicity chairman; Miss Gene Adams, Buckholts, permanent publicity chairman.

Other officers and workers will be announced in the next few days.

The roll call drive will commence on Armistice Day, November 11th and end Thanksgiving day, November 28th.

JACOB FLEISCHER, 78 DIES HERE SUNDAY

Jacob Fleischer, retired Jewish Rabbi, died at the home of his son, Abe Fleischer in Cameron at 4:30 p. m. Sunday.

Mr. Fleischer was born in Austria. He had been a resident of America for fifty years and for twenty years was pastor of a Jewish church in Omaha, Nebraska.

Four years ago he retired and came to Cameron to live with his son.

He is survived by his widow and the following children: Mrs. Ida Frank of New York City, Mrs. Sadie Fickselstein of Oklahoma City, Mrs. Lee Werth of Cameron, Abe Fleischer of Cameron, Ruben Fleischer of Omaha, Nebraska and Max Fleischer of Litchfield, Illinois.

Funeral services were held Monday afternoon at 4:30 from the Wilkerson-Hatch Funeral Chapel in Waco, the body having been moved there Sunday night by the Marek Burns Funeral home. Rev. Charles Blumenthal conducted the services.

Interment was made in the Aguda Jacob Cemetery in Waco.

R. G. Grabein made a business trip to Houston Friday.

J. Albert Young, Jr., New Manager for Texas Power & Light

J. Albert Young, Jr., of Waco became manager of the Cameron district of the Texas Power & Light Company, effective Thursday morning it was announced shortly before noon today.

He will succeed F. E. Woodruff who has been transfered to the engineering department in Dallas.

Mr. Young began his work as new manager Thursday afternoon.

He has been associated with the company for a number of years and located at Waco. He is a brother of John C. Young, former manager here.

Mrs. Young will join her husband here in a short time.

F. C. Fahrendorf Suffers Heart Stroke

F. C. Fahrendorf, widely known cotton merchant in Cameron, is recovering at his home from a heart stroke suffered here Tuesday.

Dr. Clifford Swift, attending physician, said Mr. Fahrendorf is doing well and after a few days rest will be able to resume his place in the business life of the city.

Many friends througout the city sincerely regret to know of Mr Fahrendorf's illness.

Bryan Drum and Bugle Corps Here Today at 5:45 p. m.

The Drum and Bugle Corps from the Sons of the Legion Post at Bryan will be in Cameron today at 545 to parade on the streets and to give a program on the court house square.

The Legion Post and Sons of the Legion of Bryan will be guests of the Edwin Hardy Post tonight at the hut for a barbecue. Following the supper they will be entertained with a swim in the municipal pool.

All Legionaires are requested to be on hand and to wear their caps in honor of the occasion. The public is urged to attend.

Donkey Baseball Game Here September 18th

Donkey baseball game will be staged in Cameron on Wednesday night, September 18th, by the American Legion.

The Lawless Green Field has been lighted for the night. The proceeds from the game will go to the benefit of the park fund.

Emmet Streetman, commander of the post, is responsible for booking this superb attraction.

The game will open promptly at 8 p. m. and the public is cordially urged to see this unusual attraction.

HUFFMAN PASTURE BURNS

A pasture fire on the C. V. Huffman farm west of Cameron Tuesday night threatened livestock and buildings.

The Huffman pasture is one of the best in this section. The grass was high and the flames swept by a north wind spread rapidly. Neighbors helped battle the fire but much of the fine range is today blackened and ruined.

ELM RIGDE SCHOOL TO OPEN

The school at Elm Ridge will open for the 1940 term on Monday, September 23, it was announced today by Frank Tomek, Sr., trustee in the school.

Mr. Tomek said that plans had been made to open the school on September 16th, but opening has been defered until September 23rd, which will be a more convenient time to begin.

Miss Nora Duncum and Miss Geraldine Fuchs are the teachers for the Elm Ridge School.

SOUTH ELM SCHOOL TO OPEN

On Monday September 23, the South Elm School will open. Mrs. Josie Gibbs and Mrs. Artie Schiller who were teachers the past year will again teach there. Mrs. Gibbs is principal of the school.

CALVERT GETS CALL FOR OPENING GAME HERE

Although the sun is blazing down today in a last hot blast at human kind, there is haze in the September skies and the nights are cooler.

Yesterday the Yoemen were out in full force and Coach Wood and staff were putting them through their paces.

On Friday night September 13, the Yoemen play their first game against Calvert at Yoemen field in Cameron It will be the first time for the Yoemen in their new uniforms for the 1940 season and incidentally fans can get an eyeful of the hopes and failures for the season.

The Yoemen are working hard. Monday 31 men were in uniform. That included the B squad but more men are reporting and a fairly good squad may be on the field when the game time comes Friday night.

It will be a different team this year, something with spirit and hard hitting. Coach Wood has told the people all along he may not win games but the Yoemen will be in their battling every inch. That's something he has not had for a long time.

Joe McLain, just about the best back that ever toated the Yoemen uniform, thinks the 1940 Yoemen have a lot of promise. Joe has worked out with every Yoemen team for four years and he thinks they are the best bets since 1936. Whether Joe's loyalty to Yoemen colors makes him that way right now or whether the Yoemen have something, will have to be proven along in October and November.

The parade begins today. Each day we will try to picture the men just as they are and as Coach Wood found them at the beginning of the season.

The Yoemen this year will be led by Captain Cecil Tindall. He has been shifted to the backfield. Some members of the Quarterback Club thinks he is too slow for that kind of assignment, but Coach Wood seems to be placing the men right now so Tindall is in the backfield. His normal place is at end where he lettered in 1938 and 1939. Cecil is 16 years old and a Senior, weighing 150 pounds. Cecil has been a poor punter and no better at passing, but loves the game and a good football player. He may save the team this year because he is one of three letter men back. He would have two years eligibility under the age limit rule but must bow out of the picture if he graduates.

Bobby Hays was a squadman in 1939. His advance has been rapid. He will quarterback his team this year. As a wing and tail back he will see much service. Bobby is the best punter and passer on the team and perhaps one of the fastest backs seen here in years. He is a Junior and weighs 145 pounds. Coach Wood thinks Bobby is a good prospect and with another year of eligibility should keep faith with the best traditions of Yoemen backs. Bobby loves the game, is rugged and tough and is certain to have earned a permanent place at starting time in the important schedule ahead this year.

RAF DROP BOMBS OVER WIDE AREA

A new British weapon that locates bombing planes in the air without the use of search lights and new and more powerful anti-aircraft guns today were reported to be responsible for the most amazing defense of the entire war against Nazi bombers.

When the Germans flew to attack London last night and early today, the accustomed height was insufficient and the new British anti-aircraft artillery was knocking the raiders out of the sky at a rapid rate. A total of 87 bombing planes were blasted from the skies above London in a single raid last night.

At the same time the new defense was operating over London, said to exceed anything ever imagined for anti-aircraft fire, British bombing planes were attacking military objectives in France, Germany, Holland and Belgium.

The Germans were by no means idle. Although they were driven back from London by the new high calliber anti-aircraft guns, they succeeded in dropping a number of bombs with resulting great damage.

Shortly after noon today the German government conceded that vast damage had been done in Berlin, and fires are still raging as the result of attack by British planes. An undetermined number were killed in Berlin and many were injured.

The Germans claim to have sunk six British ships in convoy but this lacked confirmation.

The unexplained arrival of attaches of the French government in Panama early today created considerable speculation.

A significant happening of the day was the passage of three French war ships through the Straits of Gibralter out into the sea and manned by French crews.

It is believed these ships are a part of the great French navy that surrendered to Britain after the collapse of France.

The Russians report that Germany had landed troops in Ireland was without foundation and the Irish say they are looking for the Nazis but have been unable to find them.

DECISIVE BATTLE IS NOW BEING FOUGHT

British bombs sown in retaliation for the sustained Nazi raid on London were reported Monday to be achieving devastation over a wide section of industrial Germany.

In Hamburg, Bremen and other cities together with the French coast where Germans are said to be concentrated for a possible invasion attempt on Britain bombers of the Royal Air Force, accompanied by British fighter planes were roaring over the Reich and delivering blow for blow.

The British Air Ministry issued a statement in which it was claimed the RAF was delivering blow for blow as the Germans continued their horrow bombings on London.

In the most terrific nad destructive bombing of the war London late Sunday was experiencing a new high in German fury with more dead and wounded and more destruction than during any day since Adolph Hitler said he was setting in for a complete blasting of Britain. British defenses in the air were believed to have been weakened by the continued bombings.

In what was described as a refutation that the British were crippled, the RAF zoomed across the channel in a challenge to German air supremacy, blasting with destructive effect many points of vital need to Germany's war strength.

The Germans renewed their attack on London Monday in what was believed would be the final and decisive attempt of the Nazi to knock out the British air force and prepare the way for an invasion of the Isles.

Cameron Hotel Man To Become Minister

Howard Whatley, owner and manager of the Cameron Hotel, has leased the property to Woodrow Lowe and will attend Southwestern Baptist Theological Seminary in Fort Worth.

Mr. Whatley will become a minister after three years of work in the Seminary.

NEWS FROM CLARKSON

The Woman's Union of the Vogelsang Church met on Sunday afternoon, September 8, with the president, Mrs. Elsie Collins in charge. Catechism on, "The Church" was given by several members who were Mesdames Gertrude Birkamayer, Alma Miller, Minnie Sager, Lillie Birkamayer Esther Miller, Gladys Matyastik, Gussie Keesel, Lillie Rummel, Lillie Boecker and Mable Bocker. Prayer was given by Mrs. Elsie Collins followed by a poem, "Forgive, O Lord, our serving ways" by Mrs. Esther Miller. Rev. Kalkbrenner spoke on "the status of the church in the world." Mrs. Ena Kalkbrenner was hostess for the club and the Ladies Aid of the Burlington Lutheran church. She served lunch to the women and their families. The meeting adjourned to meet Sunday, October 13.

Mr. and Mrs. Ervin Pimpler of Yarrellton spent Sunday with Mr. and Mrs. Gus Pimpler.

Mr. and Mrs. E. R. Burnett, Bob Patten and James Green visited in the J. E. Patten home Sunday.

Mr. and Mrs. Raymond Doskcoil and sons, spent Sunday with Mr. and Mrs. Emil Doskcoil.

Roslie Matyastik had the misfortune of falling off the bed at night, breaking her collar bone. She is improving nicely at the time of this report.

Mr. and Mrs. Lawrence Janicek and daughter spent Sunday with Mr. and Mrs. Charlie Friemel.

Mr. and Mrs. Pete Speer and family, Mr. and Mrs. Herbert Harber and family spent the week end in the B. B. Lambert home at Little River in Bell county.

Mr.and Mrs. Fred Lambert and Mrs. H. Schfarting spent Sunday with Mr. and Mrs. Ed McAtee of Wilson community.

The Clarkson school will open Monday, Sept. 16, as a standardized school with three teachers, Miss Jewell, V. E. Vilba and E. L. Hraier. No changes were made in the teachers.

Mrs. Bob Foster of Galveston is spending a few days in the home of her parents, Mr. and Mrs. Fred W. Dierr. Mrs. Foster is the former Miss Helen Dierr.

Mrs. Conn Moody spent Friday in the home of Mr. and Mrs. Vernon Roberts of Temple.

NEWS FROM MILANO

The Milano school opened here Monday morning with a full enrollment. We are looking forward this year to one of the best school years as it is the first full term in the new building. The children and teachers seem very enthusiastic over their work.

We are sorry to report Bruce Steward has not been so well. He had a stroke Friday afternoon and is not improving as rapidly as we would like.

Mrs. Dan Robinson returned home Sunday from a two weeks visit with her daughters, Mrs. Moore and Mrs. Manley in Temple. She was accompanied home by Mr. and Mrs. Manley and two children who later in the day returned to their home in Temple.

Mrs. Charles Martin and son, Charles spent the week end in Galveston and reported a pleasant trip.

W. E. O'Neal has resigned his position in Milano school as coach to accept a position in another school.

Miss Bonnie Brooks had as her guest for the week end James Craig of Austin.

James Lesser Pruitt has returned to his home at Davilla after a week's visit here with his aunt, Mrs. J. A. Baggett.

Mrs. Tom William and daughter, Mrs. Martha Preston of Rockdale were visiting in the R. E. Thweatt home here Sunday.

Jewell Hooker of Houston is here for a few days with his praents, Mr. and Mrs. W. F. Hooker.

Mr. and Mrs. Leslie Vanover have returned to their home in Houston after a ten days visit here with their mother, Mrs. Ida Howes. They were accompanied as far as Palestine by Mrs. Howes who visited with Mr. and Mrs. Ben Vanover.

Several Milano people spent the week end in Galveston. They went down in one of the school buses driven by Bob Luce. All reported a very pleasant trip.

The weather still remains dry and hot so many people in Milano are now hauling water as most of the cisterns are dry.

Ray Duckworth of Oklahoma City was a visitor here Monday.

Clayton Dierr is visiting George Fowler in Mart.

John P. O'Neill of Burlington was a business visitor in Cameron Thursday.

The following were week end guests in the home of Mrs. Isabelle Stallworth: Ray Robinson of Waco and wife, Theresa Robinson of Cameron, Mrs. J. E. Gregory of Houston, Mr. and Mrs. Ed Jett and daughters, Frances and Norris Jean and Mrs. L. L. Spann of Dallas, Paul Hanson and Mesdames Ruth Lane and Iva Kinnerley, Mr. and Mrs. T. S. Weaver and daughter, Irene and Mr. and Mrs. Joe Croisdale all of Austin, and Mrs. R. M. Parker and Mrs. Aliec Lecita and daughters, Patsy and Sandra of San Antonio.

J. E. Johnson and Emory Camp transacted business in Ballinger Thursday.

Joe Petty of Sharp paid a visit to Cameron Saturday.

Mr. and Mrs. Roy Heath of Waco visited in Cameron Sunday with relatives and friends.

John Watson and Ray O'Neill were business visitors in Rockdale Tuesday morning.

S. M. Fuller of Gause who is now 83 years old visited in Cameron Saturday.

MEN WORKING

A "FOUR-ALARM" FOR THE BLUE-GRAY TRUCKS

A KANSAS CITY bridge burst into flames one morning last spring. It twisted and writhed under the terrific heat ... then stout steel spans splashed into the Kansas River.

"Voice bridges" went out of service, too. For attached to the bridge were two large telephone cables, containing wires to 1,700 telephones. It was a four-alarm for the telephone repair crews — the men in the blue-gray trucks. While flames still soared near by, the reconstruction work began.

In a fire department rowboat they got a line across the river. Emergency telephones were rigged up at strategic locations.

Then came a driving rain to make the task even harder. All night they worked against great odds. By midnight 60 telephones were working. By breakfast time three-fourths of the silenced telephones could speak. That afternoon telephone service was back to normal.

Meeting—and whipping—emergencies is a part of the telephone man's job.

Your telephone service is backed by skilled, loyal people whose experience in past emergencies better equips them for the emergencies of the future.

AMERICA can depend on the Telephone

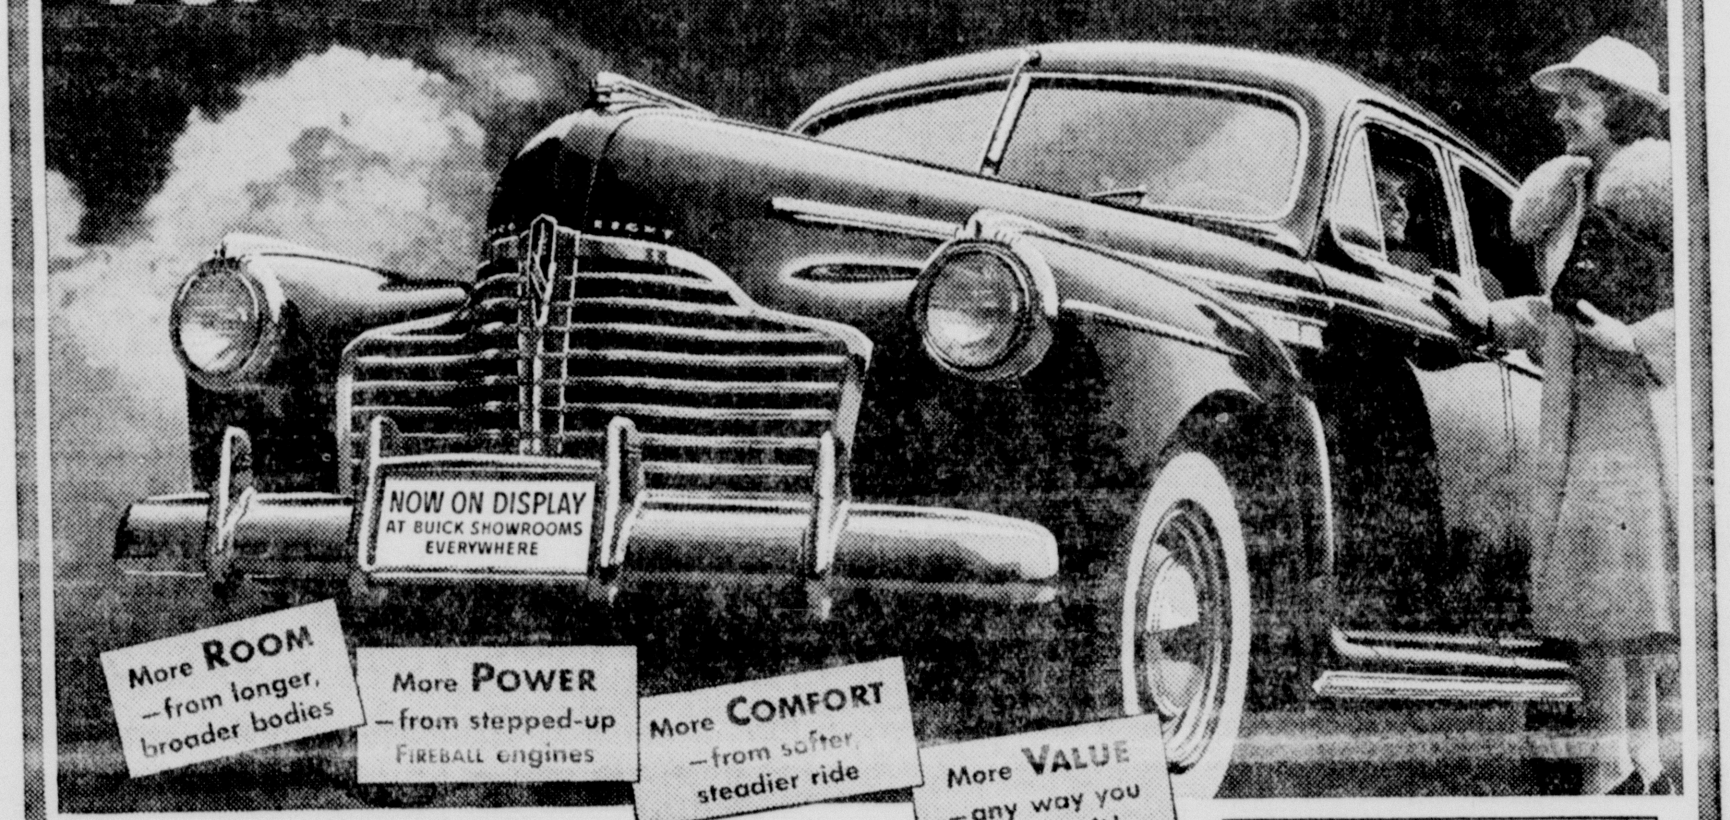
For '41—Finest We've Done!



NOW ON DISPLAY
AT BUICK SHOWROOMS EVERYWHERE
More ROOM —from longer, broader bodies
More POWER —from stepped-up FIREBALL engines
More COMFORT —from softer, steadier ride
More VALUE —any way you measure it!

WITH this advertisement, Buick ushers in a brand-new automobile model year.

1940 production is history—recording the greatest manufacturing and selling season our company has ever known.

You may be sure we grimly realized we had to accomplish things in our new cars for 1941 that we could count on to *continue* our advance.

So we've taken our greatest all-time car and steadily and carefully brought it forward to *a perfection of action, ease, goodness* beyond anything ever offered under our name.

Every car in all five series of the whole new line deserves unused fresh-minted language.

Stylewise, their suave and dynamic beauty refreshes the jaded eye as would sight of a hydrant in the desert.

They move and function like young wild things. They're all grace and poise and eagerness. They bring to driving and handling a keener pleasure and a new thrill.

Go see these superb new cars at your dealer's and ask especially about the new micropoise-balanced FIREBALL engines—the 1941 furtherance of Buick's Dynaflash design and kingpin of all the features that make Buick the sensation of the new automobile year.

*According to the Encyclopaedia Britannica, a super meteor which travels with a series of explosions like the shock waves of a great projectile is called a "FIREBALL."

ONLY CAR IN THE WORLD
WITH ALL THESE FEATURES

BUICK FIREBALL VALVE-IN-HEAD ENGINES—115, 125 and 165 horsepower.

MICROPOISE BALANCING AFTER ASSEMBLY

COIL SPRINGS ALL AROUND—no lubrication, no spring covers.

"MASS-STREAM" BODIES, with concealed running boards

COMPOUND CARBURETION—30-mile economy at 50-mile speed.

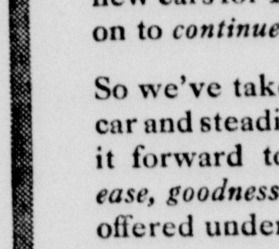
PERMI-FIRM STEERING—for freedom from steering wheel play.

DUREX MAIN BEARINGS—practically indestructible in normal service.

FORE-N-AFT DIRECTION SIGNAL with Automatic Cut-Off.

MASSIVE BUMPERS—with built-in front license frame.

PLUS: Full-Length Torque Tube in Sealed Chassis ★ Tiptoe Hydraulic Brakes ★ One-Piece "Lift-Off" Hood ★ Built-In Automatic Choke ★ Heavy-Duty Oil Bath Air Cleaners ★ Sealed Beam Headlights ★ Two-Tone Body Colors ★ Safety Plate Glass All Around



THE FIREBALL* DOES IT!

Modern gasolines have high octane ratings to permit higher compressions without "ping." Note how this piston, which can be used only in valve-in-head engines, rolls the fuel charge into the shape of a flattened ball that centers around the new, smaller, racing-car type spark plug. Fired at its very heart, this more highly compressed fuel lets go with such full-forced, "ping-free" wallop that any gasoline of 75 octane rating (now available at standard-fuel prices) may be used in the 115-hp. engine. Any fuel of 80 octane rating serves in the 125- and 165-hp. engines.

it's an AMAZING EXPERIENCE

TASTE THE DIFFERENCE BETWEEN
SOUTHERN SELECT
AND ANY OTHER BEER

● Most people who make an actual side-by-side comparison of Southern Select and other beers are amazed when they taste the difference. Yet it is only natural that Southern Select should taste so good. It is *quality* beer, slowly brewed from the finest all-grain ingredients and aged for months to full maturity. It is the only beer in the South brewed with distilled water. Make the test and TASTE THE DIFFERENCE!

FAICHTINGER-MARAK

Miss Birdie Marie Marak and Louis Faichtinger, Jr., of Ad Hall were married on Tuesday at 8 a. m. in St. Monica's Catholic church with Rev. George Duda conducting in the presence of their families and friends and relatives. The bride wore a white lace dress with a white satin bolero, also a finger tip veil and wreath. Her attendants, Miss Novella Urbon and Miss Anes Reineke, were gowned in pink and blue tafeta. Ladis Faichtinger, brother of the groom and Joe Barta, a cousin, were ushers. At high noon dinner was served and a supper at 5 p. m. Out of town guests were Mr. and Mrs. J. L. Boyer and sons, Mrs. Theo Mascrella and Joe Tusa of Waco. Mr. and Mrs. Faichtinger, Jr., will make make their home in the Ad Hall community.

ACCEPTS POSITION IN WACO

Billy Cooper, son of Mr. and Mrs. Grady Cooper, has accepted a position with the Citizens National Bank in Waco and will begin work Monday. Billy is a graduate of Yoe High School and was a student of Baylor University for the year. He has been with the Cameron Theatre for the past year.

Ray Hubert Brashear will work at the theatre in his absence.

Mr. W. F. Horelica and daughter Mrs. Alver Gravander of Ad Hall returned from Chicago last week where they attended the marriage of Miss Lois Timen, daughter of Mr. and Mrs. S. E. Timen of Chicago, to their son and brother Hubert Horelica, formerly of Texas. The ceremony was performed at the St. Chrysastom's Episcopal Church at 4 p. m. by Rev. Hauser. The bride given in marriage by her father, wore a gown and veil of white chiffon and carried a bouquet of gardenias. Miss Peggy Miller maid of honor, wore a gown of aqua chiffon Miss Lorene Lavery brides maid wore a gown of peach chiffon and both carried bouquets of Talisman roses. Both mothers wore corsages of Talisman roses. The bride groom was attended by his cousin August Barta, formerly of Cameron as best man. Henry Varming as usher. Miss Mary Fox played "Because," "The Wedding March," "I Love You Truly," and "Oh Promise Me" during the ceremony. Dinner was served to few of the close relatives and friends at the bride's home after the ceremony. At 8 p. m. there was a reception for all the friends. Many came to wish the new married couple happiness in the new life.

Miss Lillian Barclay of Waco, a former resident of Milam county, was a visitor here Saturday.

MARLOW SCHOOL TO OPEN

The Marlow school, a standardized school with 7 grades, will open Monday, September 9th with the same teacrers as last year, Mrs. Mott Terry and Mrs. Tom Jeter. Trustees of the school are Jim Short, Sherwood McLerron, Jr., and John Tindall. A new radio has been purchased in order to meet the requirements of a standardized school.

DETMOLD SCHOOL TO OPEN

The Detmold school will open Monday, September 16. The teachers are the same as last year, Owen W. Feist and Mrs. W. C. Edwards. School improvements have been completed during the summer and all is in readiness for a pleasant year's work.

NON-MEMBERS WILL BE WELCOME CONTRIBUTORS TO FURNISHING BAPTIST EDUCATIONAL BUILDING

First Baptist Church now engaged in a program to buy chairs for their new educational building will welcome contributions from non-members.

The Daily Herald has received a letter from H. G. Cooper, expressing thanks for an item run two weeks ago regarding the program. In this letter Mr. Cooper says the church will welcome and appreciate contributions from non-members.

During the pre-building campaign a number of interested citizens not members of the church made contributions to the building fund. This co-operation was deeply appreciated by the church.

At present the matter of buying chairs for the new building is important because it will mean full use of this fine structure with all its available capacity.

LINAM-LAMAR

Thomas P. Linam, son af Mr. and Mrs. T. W. Linam of Maysfield and formerly a member of the Ada Henderson school faculty was married to Miss Anna Jean Lamar, daughter of Mr. and Mrs. Henry C. Lamar of Rosebud Monday, September 2, in Temple with Rev. Grady Metcalf performing the ceremony. Mrs. Linam graduated from Rosebud high school and attended TSCW in Denton. Mr. Linam is a graduate of Cameron High School and Baylor University. At present he is principal of the Rosebud high school and they will make their home in that city.

Mr. and Mrs. Francis Cox transacted business in Waco Wednesday.

BOY SCOUTS

(Continued from page one)

sions at the Ranch on Little River, may be understood by the following outline.

The Rodeo will not be excelled by any other at any time in Texas for Mayor Reese Lockett of Brenham, former director of Tex Richard's Madison Square Garden rodeo in New York City, will have full charge of this grand spectacle of frontier western life for the Boy Scouts and other guests. Mr. Lockett is also with the Fort Worth Fat Stock Show and is now directing the Houston Rodeo.

E. H. Coffield of Cameron, uncle of the host, returned late Monday from Houston where he obtained the use of a public address system used by the Gulf Oil Corporation, the only one of its kind in America. The Gulf Oil Corporation was glad to lend this sound truck when requested by Mr. Coffield.

Texas newspapers will have staff photographers on hand for a complete coverage of the event. A Fox movie tone camera man will make a short motion picture for nation wide distribution to theatres.

During the afternoon all troops will compete in scout contests and a fine troop placque will be presented for first place. Awards will be made for second and third places.

Being primarily a Boy Scout program every scout must be in uniform or must wear scout shirt and neckerchief if complete uniform is not available.

All expenses of transporation from each troop headquarters to the rodeo and return will be paid by the host. Scouts are asked to leave their pocket books at home as everything will be free.

Mr. Coffield has graciously taken care of all details even to the arrangement for a doctor and nurse to be on the grounds and a first aid station, fully equipped will be provided.

Friends throughout this section of Texas and many from distant places throughout the nation are congratulating the Coffield's on this happy occasion for 12 year old Petie, a regular fellow who will spend about the happiest day of his life playing host to his buddies in the Scout troops over Central Texas.

The invitations bear a picture of Petie in Scout uniform giving the Scout salute.

H. H. Coffield, native citizen of Rockdale, is one of Texas' leading business men. He has amassed an immense fortune in oil and other investments.

The story of H. H. (Pete) Coffield is a tribute to legendary American opportunity. The success he has attained gives him high rank among the younger American business executives. He is finding a way to exemplify the best traditions of his native South and contribute to the happiness of those about him and to play his part in the great destiny of Imperial Texas.

SERVICES HELD FOR BUCKHOLTS RESIDENT

Funeral services were held Wednesday for Mrs. J. O. Hagler of Buckholts who died at her home Tuesday

She is survived by her husband; three daughters, Mrs. Dave Fowler and Mrs. Clifford Walker of Buckholts and Mrs. Howard Smith of Hoffman, Okla., and seven grand children and six great grand children.

Burial was made in Friendship cemetery.

CHALMERS-WALSTON

Jack Chalmers and Lorene Walston were married Sunday afternoon by Justice of the Peace Womack Brashear at his home here and Mr. Chalmers is a resident of Temple but has lived in Cameron for the past month. Miss Walston is a resident of Cameron. They will make their home in Cameron.

Mrs. Frank Torno and daughter, Leslie Rose, Mrs. Lucille Przybysz and daughter Eva Jean, Pressley and Leland Foyt of Temple and Roland Clifton, spent Sunday at Buchannan Dam.

Mr. and Mrs. T. A. Wright and son Tommie, Jr., of Graham, visited her parents, Mr. and Mrs. W. P. McCall for a few days, and left for Galveston, accompanied by her father, where they spent some time fishing, returning to Cameron Thursday night and left Friday afternoon for their home.

Mrs. A. E. Matula shopped in Waco Wednesday.

WSCS MEET

The Women Society Christian Service, of the Methodist Church met Monday afternoon at 3 o'clock. Mrs. Howard Baskin led the devotional service, after which installation of officers followed, Rev. John W. Mills, pastor presiding.

The lesson for the afternoon was from the year book, and was given by Mrs. R. L. Batte, the president.

Plans are being made for the Texas Conference of the Women Society Christian Service which will be held in the Cameron Methodist Church Sept. 30th through Oct. 1st.

Mesdames R. L. Batte, Lacy Wills, J. M. McLane, W. O. Triggs and Ruth Rosson will go to Huntsville Wednesday to Officers Training School of this district.

Mr. and Mrs. Harleigh McGregor and sons Don and Douglas of Lawrenceville, Ill., are spending their vacation here with his mother, Mrs. C. P. McGregor and other relatives. While here they made a business visit to Houston, Tuesday and Wednesday. Friday and Saturday they visited Mr. and Mrs. Thomas A. Caldwell in Austin.

LOIS BELL WALSTON DIES MONDAY NIGHT

Lois Bell Walston, 8 months old, died Monday night shortly after 9 o'clock. She had been ill for the past two months.

Lois Bell is survived by her father and mother, Mr. and Mrs. Virgil Blake and two brothers, Virgil Wyne and Charles Wayne Walston.

Funeral services were held Tuesday afternoon at 3:30 at the Little River Cemetery where burial was made. Green's Funeral home directed arrangements.

Mrs. W. F. Horelica and Mrs Alver Gravender visited in the home of Mr. and Mrs. O. Schurch, Mr. Gravender's uncle and aunt, and other relatives while in Chicago.

Mr. and Mrs. C. I. Jackson and Mr. and Mrs. A. C. Barnett of Temple visited Mr. and Mrs. H. W. McNeil and Mr. and Mrs. John Haygood Sunday afternoon.

Henry Lippman, Floy Ward, Robert Lee Dakel and Frances Ward visited in Waco Sunday afternoon.

H. E. Glass of Sharp as a business visitor here Saturday.

Way "Build-up" Helps Will Interest Women

The cause of a woman's periodic suffering from headache, irritability, cramp-like pain, may be *functional dysmenorrhea* due to malnutrition, a condition that is often helped by CARDUI.

Principal way CARDUI helps is by stimulating appetite and the flow of gastric juices. Thus it may aid digestion; help build up a woman's strength, energy and nerve-force; so increase physical resistance to periodic discomfort.

It also helps reduce periodic distress for many who take it a few days before and during "the time." Your confidence in CARDUI is invited by its 50 years of popularity.

VISIT INKS DAM

On Thursday, September 5th, Mrs. Dixie White, Mrs. Bob Young and NYA girls of Cameron, Mr. Kyle and NYA boys of Ben Arnold, Mrs. E. Baker and one of her girls and a few of the NYA boys from Buckholts left for Inks Dam. They reached the dam about 1:15 where a dinner prepared by the boys was thoroughly enjoyed. Over three hundred boys are employed at the Dam and their supervisor gave an interesting talk telling of the duties and occupations they had to perform. The group was invited to observe the kitchen, work shops, houses, etc, the most outstanding of which was the gymnasium. After visiting Longhorn Cavern and eating supper in Burnett they returned home.

GETS DAILY IN ARKANSAS

Herman Gerick writes the Daily Herald from the Army and Navy hospital at Hot Springs, Ark., as follows: "I received a copy of the Cameron Daily Herald every day since I have been in this hospital. I enjoyed reading it to know of the many things that have happened around Cameron. I also had my appendix removed last Saturday morning. I feel just fine and hope to be home soon."

Alex Krause of Temple was a business visitor here Tuesday.

MEET IN SPECIAL SESSION

Special session of the Commissioners' Court was held Friday to open bids for the purchase of a grader for Precinct 3. The bid was awarded to Browing-Ferris, machinery Company of Houston.

The bond of F. H. Wied, public weigher of Burlington, was approved.

NEWS FROM MINERVA

Friends of Harold Jones of Minerva were interested to know of his marriage to Miss Ada Lee Massengale of Maysfield, which took place on Thursday evening, September 5, at the Presbyterian parsonage in Cameron, with Rev. O. C. Acery, pastor, reading the ceremony.

The couple was accompanied by Valter White and sister, Mrs. Doris Gleason of Maysfield and Miss Mable Jones of Minerva, sister of the groom.

They will make their home here where he is connected with his father, W. A. Jones.

* * *

Mrs. Bill Hinton and children of Crosby were guests of Mr. and Mrs. D. C. Richards and children, last Thursday evening.

Mr. and Mrs. Vernon Edwards and children of Beaukiss spent the week end in the Dudd Currey home.

Cliff Wallace of Centralia, Ill., is spending several days of this week with his parents, Mr. and Mrs. Lee Wallace.

D. F. Robinson and daughter, Miss Mary Frances, were Brenham visitors, last Wednesday. Miss Robinson remained in that city where she will be a member of the school faculty.

Mr. and Mrs. H. C. Fleming and daughter, Miss Artie, spent several days of last week in Elgin, McDade and Austin.

Mr. and Mrs. T. C. Whites of Cameron visited Mr. and Mrs. Chas. Whites Sunday afternoon.

Mrs. Robert Currey spent from Monday until Wednesday of last week with Mr. and Mrs. Noble Currey at Goose Creek and was accompanied home by her daughter, Kathleen, who had been visiting there for sveral days.

Mr. and Mrs. Percy Ledwell and children returned to their home in Corsicana on Sunday after a vacation visit with his mother, Mrs. Myrtle Ledwell.

Mr. and Mrs. Bentley Fletcher moved to Houston on Monday where he will be in business for himself. Local citizens regret to have them move but wish them success in their new location.

Mrs. Seth Sheppard and daughter, Miss Doris of Rockdale, visited Mr. and Mrs. Jim Pate last Wednesday.

Rev. R. F. Stewart and daughters, Misses Juanit a Ouitah, spent Monday in Marlin, where Rev. Stewrat attended a pastor's meeting called by Rev. C. W. Lokey, District Superintendent.

D. Harzke of Dime Box is here to relieve H. C. Fleming, section foreman, who is on a two-weeks' vacation.

Joe McKey spent last week end in Corsicana.

Mr. and Mrs. E. E. Holland and daughters, Dawn and Louise, of Dallas were guests of Mr. and Mrs. Denton House and little daughter, last Monday afternoon.

Gib Terry and Robert Currey enjoyed a fishing trip to Buchanan Dam over the week end.

Mr.and Mrs. Denton House and little daughter left on Tuesday morning for a vacation visit with his uncle and aunt, Mr. and Mrs. Grover House at Junction.

Calin Boedeker of Chriesman spent Sunday with his sister, Mrs. Gilbert Terry.

Frank Fleming of Austin was a guest of his parents, Mr. and Mrs. H. C. Fleming, Sunday. From here he went to Corpus Christi where he has been transferred with the Bell Telephone Company.

Julian Terry and Johnnie Martin have enlisted in the U. S. Army and left this week for Fresno, Calif., where they will be in the Medical Corps at March Field.

D. F. Robinson and daughter, Miss Lois, attended dedicatory services at the new Sharp school on Sunday afternoon.

Mr. and Mrs. H. F. Gohman of Rockdale visited Mr. and Mrs. Jim Pate Friday.

Miss Margaret Lucas of Dallas spent the week end with her parents, Mr.and Mrs. G. C. Lucas.

Revival services will begin at the local Methodist Church on Wednesday evening, October 9, and everyone is urged to make preparations for attending these services.

The local school will open on Monday, September 16. Teachers for the term will be Miss Floy Hewett of Caldwell, principal; Mrs. Edna Clarke of Minerva, intermediate; and Mrs. Lucian Reed of Rockdale, primary. Trustees are Davis Jenkins, Roy Terry and Dud Currey. Local citizens are looking forward to a successful school term.

David Lewis of Dallas was a guest in the G. C. Lucas home for a short while on Saturday evening.

The members of the WMS met at the church on Monday afternoon to reorganize the society, under the new church system.

Mr.and Mrs. Charlie Hooker and Clarence Wilson of Rosebud were guests of Mr. and Mrs. H. C. Fleming, on Sunday.

Drum and Bugle Corps Here Thursday

The Drum and Bugle Corps from the Legion Post at Bryan will be in Cameron Thursday afternoon at 5:45 for a demonstration and program on the court house square.

Emmet Streetman, commander of the local Legion post said the Legionaires are requested to be on hand and to wear the caps in honor of the occasion. The public is also urged to attend.

Mr. Streetman said the post is making plans for a Donkey Base ball game here at Lawless Green Field on September 18th and details will be announced later.

JUNEK-BEALE

Walter Junek and Miss Annie Laurie Beale were married in the office of Judge Jeff T. Kemp Monday morning. Both are residents of the Curry community where they will make their home.

NEW BUICK FOR 1941 HERE

The John Muse Motor Company has received the new Buick for 1941. This new car declared to be the best car Buick ever built features all the improvements of modern engineering up to date and is being appraised with interest by the public today.

CELEBRATION MONTH
7TH ANNIVERSARY OF THE RETURN OF BEER
"The Beverage of Moderation"
MAY
JUNE
JULY
AUG.
BREWED CONTINUOUSLY SINCE 1886
Pearl
LAGER BEER
Special

Now!

BREAKING ALL RECORDS

Everyday MORE Texans say, "Bottle of Pearl, please". Constantly increasing sales have won leadership for Pearl Beer. Pearl's perfect balance of body, quality, and flavor bring real refreshment and satisfaction to the taste-wise. The reason is in the bottle.

THE ONLY TEXAS BEER

Thank You

. . for the part you Texans have played in Pearl's success. Month after month for 7 years Pearl Beer sales have increased over the corresponding month of the preceeding year, and each year the Brewery's expansion keeps pace with sales

Nation, State, County, and City reap rich Benefits from the Return of Beer

What are the benefits of the return of beer? Over a million steady jobs; 10 billion dollars new volume for American business, industry, and agriculture since 1933; over 100 million dollars for American farmers in beer crop sales this year; over 400 million dollars a year in tax revenue, lifting a tax burden you would otherwise have to help shoulder.

How does it benefit Texas? 292 million dollars in added retail trade volume; 40,000 jobs; a vast new market for Texas farmers; nearly 11 million tax dollars to state and local treasuries in 7 years to relieve your own tax burden.

93c of each dollar you pay for Texas beers stays in Texas. Think! Then drink. Remember to say, "Bottle of Pearl please"!

SAN ANTONIO BREWING ASSOCIATION

Say: "BOTTLE OF PEARL, PLEASE"

GRADY LITTLE, Distributor.

Phone 83. Cameron, Texas

The Pioneers—it was land that brought them to the West!

They were hardy men who pushed our frontiers toward the West. Men who knew what they wanted. Men who weren't to be stopped. What was the magnet that drew these men—many with their families—from the comparative security of the already settled East to the frontiers that had yet to be tamed? It was land. Land to own. To build upon. Land to grow crops on. No obstacle was too great for them!

LAND IS WEALTH

The frontiers are gone, but not the pioneers. There are still men with foresight. Men who love the land. People are still making sacrifices that they might own a parcel of this earth upon which we live.

Lions Host to Students; They Hear Talks on College Life

Fifty-five boys and girls, graduates of Yoe High School who will attend college this fall, made merry at the Lions Club Banquet tendered them on Tuesday evening of this week at Cato's Coffee Shop.

Thirty Lions and their ladies joined with youngsters in the fun fiesta, which included a good deal of old fashioned school pranks when Lions joined with the students in a free for all spitball, grape chunking spree. Everyone laughed, joked and ate good food.

Upon introduction of guests, students told what year they finished Yoe High and what schools they would attend this year. Cameron will have students in all the State's higher educational institutions this fall. Superintendent E. A. Perrin in charge of the program, read statistics furnished by the University of Texas which revealed that Cameron graduates rate higher than any other freshmen groups at that institution from other cities.

Miss Vivian Whites told in an interesting way "What Student Opinions were on World Affairs Today." Milton Leech in a very witty speech told of how "Youth today will meet responsibility in world affairs. Popular Yoe High musicians favored with their talent. Misses Catherine Monroe and Catherine Mode gave piano numbers and Billy Triggs sang. Dr. C. G. Brindley toasted the youthful collegians and added some fine advice and inspiration to his address that will be helpful.

ST. RITA CIRCLE

The first meeting of the St. Rita Circle for the new year was held this week. They planned the annual bazaar and chicken supper for September 15th, beginning at 5 p. m. Mrs. John Suitor and Mrs. Herman who were hostesses for the afternoon served ice cream and cake.

Mr. and Mrs. Bennie Patterson visited in Maysfield Sunday.

Louise, Dorothy and Winnie Roden visited Mrs. T. F. Cloud, Jr., Sunday evening.

Miss Lella Love is visiting in Somerville.

Mr. and Mrs. Jack McKinney and Mr. and Mrs. Hugh McKinney, Jr, visited Mr. and Mrs. H. P. McKinney.

Those who enjoyed ice cream in the T. R. Tucker home were: Mr. and Mrs. Bennie Patterson, Misses Grace and Ruby Roden and Louis Roden and Jerome Canady.

Little Melvin Tucker visited Mr. and Mrs. Bennie Patterson Saturday.

G. W. Roden and H. P. McKinney transacted business in Calvert Friday.

CHRISTIAN SCIENCE SERVICES

"Substance" is the subject of the Lesson-Sermon which will be read in all Churches of Christ, Scientist, on Sunday, September 15.

The Golden Text is: "If we hope for that we see not, then do we with patience wait for it" (Romans 8:25)

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "Bring ye all the tithes into the storehouse that there be meat in mine house, and prove me now herewith, saith the Lord of hosts, if I will not open you the windows of heaven, and pour you out a blessing, that there shall not be room enough to receive it" (Malachi 3:10.)

The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "The universe reflects and expresses the divine substance or Mind; therefore God is seen only in the spirtual universe and spiritual man, as the sun is seen in the ray of light which goes out for it" (page 300.)

Adverstise in the Midget.

HOYT SCHOOL TO OPEN

Hoyt school will open Monday, September 9, as a standardized 7 grade school. Miss Otilia Wilkerson and Miss Lois Randolph who taught in the school last year will again teach this year.

M. G. Cox transacted business in Calvert Thursday.

John S. Burns of Austin, formerly of Cameron, is now in the naval reserve along the Cuban Coast. He sailed from New York on the Arkansas August 19th.

Mrs. Fred Garrison and her two sons, Bob and David of Waco visited Mrs. Lucile Przybysz and daughter, Evva Jean on Wednesday.

NOTABLE NEWS EVENTS IN PICTURES

FOUR OF A KIND—They gained fame when they were born, but new occasion has arisen. Badgett quadruplets are now aunts through birth of niece to oldest sister, Mrs. J. L. Jones, also of Galveston, Texas. They're Joan, Jeraldine, Jeannette and Joyce.

A RARE BLESSED EVENT—A rare event, which scientists say happens once in 100,000 times, occured on Van Nuys, Cal., dairy farm as triplets were born to "Helen Dale Burk," prize cow.

Scarecrow Made Of Tin Cans

This unusual scarecrow was made by farmer J. Day, of Salinas, Calif., to protect his lettuce crop. Sally Johnson inspects the 'crow, made of tying tin cans to a revolving crossbar which turns in the wind.

GETTING SET—September heat holds no fears for these college all-stars as they undergo training for game with Green Bay Packers in Chicago. On campus of Northwestern University, Coach Ed Anderson of Iowa demonstrated blocking with Stan Anderson of Stanford. Looking on are Nile Kinnick, Gren Lansdell, Bob Kellogg, Ben Kish, Ken Kavanaugh, Dom Principe and Vic Marino.

ASKING RAIN GOD FOR HELP—Twentieth Century version of the Indian rain dance—youngsters from New York Children's Aid Society beat tom-toms seeking relief from oppressive heat.

Army Mule Mustered Out

The cotton fields of Dixie will remain the stamping ground of this mule and 599 others purchased for the French army and left in Atlanta. The purchasing agents authorized sale of the 600 animals at public auction.

IT TOOK THE BEES—Neither rain nor sleet nor gloom of night, etc., can hold up the U. S. mail, but these bees did, for three days, in fact, as they camped atop mailbox in Sacremento, Cal. Pretty miss had to wait.

SAUCEPANS
FOR
SPITFIRES

"ENGLAND EXPECTS EVERY MAN . . ."—London schoolboys do their bit in England's war effort. Using a home-made barrow, these youths collect scrap metal for war industries.

ROAD CLOSED—A street in Orleans, France, literally choked with debris, shows terrific blasting given town by Nazis' huge bombers.

FALL COCKTAIL SUIT — This black velvet, copper and gold embroidered cocktail suit worn by Hedy Lemarr was designed by Adrian. Pencil-slim skirt is topped by long jacket.

The Simple Story of a Useful Texas Citizen

By VIOLET ROBERTS

Box 16, Weatherford, Texas.

(Copyright, 1940, by the Southwest Magazine Co.)

ONE of the most useful citizens of Weatherford, (Parker county), Texas, is G. A. Holland, age 81, ex-mayor, banker, farmer, school trustee and historian.

Mr. Holland was born in Marshall county, Kentucky. in 1859. While teaching a back country school in Kentucky some one mailed him a copy of the weekly "Weatherford Times," which told in alluring phrases the tremendous industrial and agricultural possibilities of Weatherford and Parker county.

After reading this copy of the Times, young Holland lost all interest in school teaching. He was sold up to the hilt on Texas.

Resigning his position as teacher, he bought a railroad ticket for Texas and boarded the first train headed for the golden west.

"I finally landed in Poolville, a small community in north Parker county," said Mr. Holland, "with just $27.36 in my pocket.

"Poolville at that time (1882) was a frontier village without a postoffice, without a railroad, without even a school of any consequence. At last some of the citizens got together and decided they must have a postoffice. I made application through Congressman S. W. T. Lanham (later Governor of Texas) for the job and in a short while was appointed postmaster. Poolville folks would now get their mail direct without having to go to some other town for it.

Patrons Called Me "Doctor"

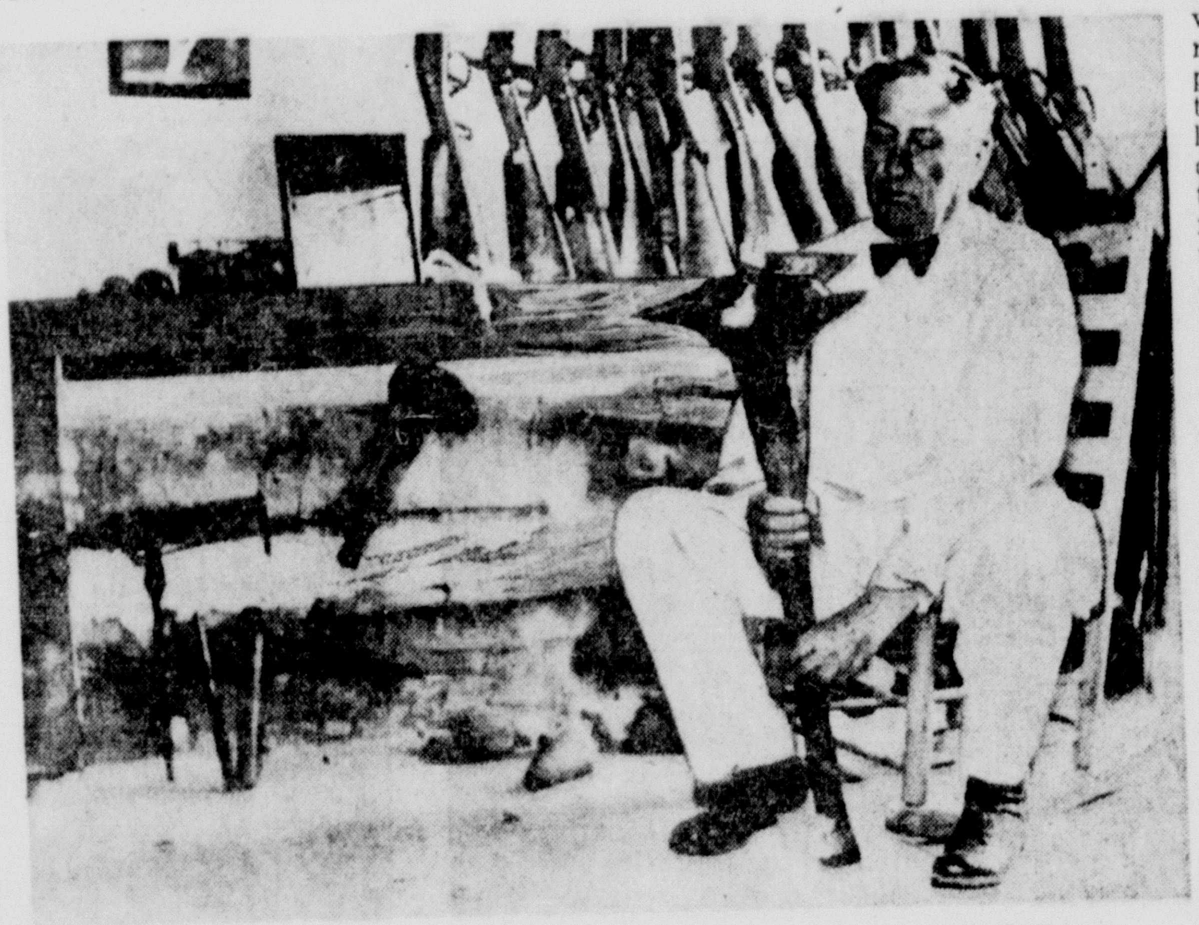
"Poolville had no drug store. I bought a few drug supplies, including patient medicines, turpentine, castor oil, paregoric, calomel, blue mass, arnica, etc., put them on a shelf near the postoffice entrance and when not busy sorting and passing out mail I waited on customers who wanted something in my 'drug line.' It wasn't long until patrons began to call me 'doctor' and asked me to prescribe for their minor ailments. Young mothers would rush frantically into the postoffice and exclaim: 'Doctor, please give me some paregoric quick for my sick baby!'

"I was now, it seemed, on the road to fame. Postmaster, doctor, president of the dramatic club, church choir leader and Democratic chairman. On top of all these honors I was elected Justice of the Peace. People asked me deferentially: ''Squire, when are you going to open court?' But what thrilled me most was when the precinct constable would stand on the courtroom steps and proclaim in a loud and commanding voice: 'Oh, yes! oh, yes! the Honorable Justice Court of Precinct No. 3 is now in session.'

"Poolville people, with few exceptions, were law-abiding. Sometimes cowboys would imbibe a little too freely and empty their six-shooters into the air as they galloped out of town. But if hailed into court they paid their fines promptly."

Mayor Three Terms

In 1888 Mr. Holland was elected county tax collector, and moved from Poolville to Weatherford, the county seat. Six years later he was cashier of the Citizens National Bank of Weatherford and finally became its president.



INTERIOR VIEW OF DOUBLE LOG CABIN MUSEUM, Weatherford, Texas. G. A. Holland, founder of the museum and collector of pioneer relics, is pictured above sitting in a rawhide-bottom chair holding in his hands an Indian war-club.

He was elected mayor of Weatherford in 1932, serving three 2-year terms. While mayor the city completed many worthwhile projects, including a new city hall, expensive viaduct, street paving, three ward school buildings and a $200,000 senior high school building.

Despite his many years of business activity, Mr. Holland takes time off to pursue a few hobbies. His favorite hobby is the collection of pioneer relics. He has a museum of these relics displayed in Double Log Cabin, two old pioneer cabins that he purchased and removed to Holland's Park, two miles east of Weatherford. The two cabins have a history of their own. One of the cabins was built in Parker county in 1860 by H. R. Moss. The other cabin was built in Parker county in 1855 by Dan Waggoner, late prominent North Texas ranchman. The cabin built by Moss figured in an Indian battle; its front door and some of its logs are marked by bullets fired from the guns of Indians who, in 1873, attacked the Baumgarner family then living in the cabin. During the exchange of shots George McClesky, guest of the Baumgarners, was killed.

Early Day Architecture

By placing the two log cabins parallel with one another, a hall between, Mr. Holland tried to carry out the early day style of architecture known as a double log cabin. This style of architecture today is known as a duplex.

The cabin logs, hewn by a broad-axe more than 80 years ago, are still sound as are the oaken doors. The two cabins are literally filled with early day relics and curios picked up here and there by Mr. Holland over a period of years. Among the relics is a buffalo robe once worn by Cynthia Ann Parker, white wife of the Indian chief, Peta Nocona. Cynthia Ann was wearing this robe when captured by Capt. Sul Ross and his Texas rangers at the Battle of Pease River, fought in 1860, a battle that broke the power of the Comanche tribe in Northwest Texas.

Mr. Holland's gun collection in his Double Log Cabin Museum covers a wide range — from a blunderbuss to a flint-lock dueling pistol, flint-lock rifles, cap and ball rifles and six-shooters, buffalo rifles, civil war muskets, etc. He has one old rifle that spit fire behind cotton bales in the Battle of New Orleans. The crude old blunderbuss gun was brought to America by the Pilgrim fathers in 1620. The collection of Indian arrows, bows, tomahawks, moccasins, beaded headdresses and jackets is replete and shows ornate workmanship. One pair of moccasins was worn by Chief Quanah Parker, son of Cynthia Ann Parker.

Most Prized Relic

The relic that Mr. Holland prizes most in his museum collection is his mother's spinning wheel and loom brought from Kentucky. As a boy he learned to card and spin. During recent years he has spun the thread and carded the wool for two suits of clothes, one of cotton and one of wool. He has worn these suits on several gala occasions. At a National Democratic Convention in Chicago he wore the cotton suit. To Mrs. Franklin D. Roosevelt and Mrs. John Nance Garner he has presented towels woven with his own hands.

Perhaps the oddest of Mr. Holland's hobbies is that of making beads from rattlesnake bones. He got the idea from the Australians. During the first warm days of spring he catches and cuts off rattlesnake heads. Then he removes the snakes' vertebra, strings them on heavy wire and boils them in white soap water until the meat particle slips from the vertebra. After more washing, scrubbing and polishing, the bones are restrung on a stout cord to make a necklace that resembles a chain of beautiful white coral.

Mr. Holland spends much time on his farm near Weatnerford. He believes nothing contributes more to man's health and forthright living than intimate contact with the soil. He grows a variety of products, and is very proud of his pecan orchard and has done some experimenting with English walnuts. The seed of these walnuts came from the famous Gettysburg battlefield.

This story of a useful citizen would be incomplete without mentioning the history Mr. Holland compiled of Parker county. The book, handsomely bound, preserves much of Parker county's pioneer history which otherwise would have been lost. No county in Texas has a more colorful early day history than Parker county, once the favorite home of the red man, the buffalo, the deer and the antelope.

The Battle of Britain

By HANSON W. BALDWIN

(The New York Times)

FOR more than two months the Battle of Britain has been fought in the air and on the seas. Since the night of June 18-19, when tortured France was still negotiating for peace, there have been few intermissions.

What are the military results of these two months of war? Have the ramparts of the British fortress been breached? What of the war at sea, the war in Africa?

In the past ten weeks the Battle of Britain has been primarily a campaign in the clouds. Bombing raids have epitomized the struggle, which has waxed and waned, but which is now definitely in its second phase, with present activity perhaps prefacing a third and more intensive phase.

Photograph shows German Stuka bomber plane (left) and British Hawker Hurriane fighter (right). The Hawker is attacking the Stuka.

The first phase started with the ending of the conquest of France. German planes began on June 18 somewhat sporadic but insistent raids against Britain. These raids gradually grew in size. At first they were directed primarily against armament factories, plane factories, oil dumps and shipping; later, ports became the primary objectives.

The Attacks Develop

Early in July the second phase, growing out of the first and merging with it, started. The raids became larger and more intense. As the Germans developed more and more air bases in their conquered territories close to Britain the raids reached a tremendous crescendo, directed primarily against British airfields.

At the same time Britain has bombed objectives within Germany every night except one all summer long, and her Wellingtons, Blenheims and Hudsons have conducted small daylight raids against airports, sea ports, etc., in German-conquered territory. The British raids have been on a smaller scale but with greater continuity, and apparently with considerably smaller losses to British bombers.

The results achieved by either side are hidden under a strict veil of censorship. Britain claims to have shot down over 1,250 German planes since June 18, great numbers of them in the recent mass raids. Germany admits the loss of about 350 and says that British has lost more than 1,500 planes since June 23; Britain admits the loss of more than 300.

Ratio of Losses

Such contradictory figures are incapable of satisfactory proof. But since the attacker in the air, when operating against a strong aircraft defensive system, must expect greater losses than the defenders, it seems probable that the Germans have lost more planes than the British, perhaps in the ratio of two or even more to one.

And it seems certain that even the greatest losses claimed as inflicted—and the actual losses are unlikely to be more than the claims—are insufficient to cripple or reduce the air strength of either side, since the factories of both sides are now turning out more than enough planes to replace losses, and since there are ample reserve crews, at least for the immediate future.

Unofficial sources in Britain say that Britain is now producing planes at the rate of more than 1,800 a month, a higher rate than Germany. Impartial sources in this country question this, though the British production rate is generally estimated at between 1,200 and 1,800 monthly. Germany's production is placed at a higher figure by most observers, who estimate that she is now producing more than 2,000 a month, perhaps close to 3,000. American production going to Britain makes up some of this difference, however, and it is probable—if German bombings do not materially reduce plane production in Britain—the combined British and American output will exceed the German output some time in the next four to nine months.

But Germany's present plane strength is considerably superior to Britain's—in what ratio is not known, but probably by a ratio of at least two to one, possibly far more. Despite the speeding lathes of British factories Germany therefore still has the lead in the air.

What she has done with it in these past two months is not so clear. There can be no question that British factories, ports, shipping, airports have been damaged; perhaps certain vital "bottleneck" plants, such as the nitrogen plant at Billingham repeatedly bombed by the Germans, have been more seriously hurt than we know. Casualties have been caused and British defenders overworked.

Damage Limited

But British convoys are still steaming along the Channel and through the strait of Dover; ports are still being used; factories are still turning out planes; British fighters still buzz angrily aloft whenever German bombers approach the British Isles, and British bombers have unquestionably caused damage and injured morale in the Ruhr and in other German localities which have been regularly bombed.

While considerable damage has been done to both sides, possibly more of it to Britain, it is probable that neither Germany nor England has been vitally hurt. The acid test is still to come. Recently Germany has been bombing London at night, dropping incendary bombs in the heart of London's business district. Britain retaliated by bombing the heart of Berlin.

In the war at sea almost 700 ships—2,350,000 tons—(exclusively of shipping lost by Germany and Italy) had been sunk up to about August 1. More ships were sunk in July—about 108—than any other month of the war, but the tonnage losses—about 333,000 tons—were somewhat less than in June. Accurate figures for August and September are not yet available, but it is likely that about the same average rate of destruction is being maintained. In itself this rate of ship losses, though embarrassing and perhaps eventually dangerous is not yet serious and is less than one-half the daily average maintained during the unrestricted German submarine campaign of 1917.

But magnetic mines and airplane bombs have unquestionably damaged many ships, probably far more than have been sunk, and any ship in dockyard hands is a ship "out of circulation" and hence temporarily lost to Britain as

(Continued on Page 5, column 3)

Colossal Longhorn Cavern

ALMOST in the geographical center of Texas, between Burnet and Marble Falls, on U. S. highway No. 28 and State highway No. 66, is the colossal labyrinth named LONGHORN CAVERN—the third largest cave in the world, says the State Park Board, in a recent booklet.

Time and water have wrought fantastic rock formations in the winding passageways and immense chambers of Longhorn Cavern. Colorful vista of stalactites and stalagmites and walls sparkling with calcite impress the eye at every turn and intrigue the imagination.

One of many immense rotundas in Longhorn Cavern.

That this unique creation of nature might be available to Texans, Longhorn Cavern was taken over by the State of Texas and made a State park. Eight miles have been explored without reaching the end of this cave. Trails have been built to enable the youngest and the oldest visitor to go through the cavern in safety and comfort. Longhorn Cavern has been extensively developed and is equipped with an electric lighting system.

The "Sam Bass" entrance to Longhorn Cavern was named after Bass, who, according to legend, used this entrance to the cave to evade officers of the law. In the interior of the cave is a huge footprint said to be that of Bass. Rust-eaten revolvers and flattened bullets found in the cave indicate its use as a rendezvous for fighting men.

Numerous Rooms and Grottoes

Leaving the Sam Bass Entrance, the trail winds through numerous rooms and grottoes, each decorated by nature in a different way. In the Main Room is an immense chamber, nearly 183 feet long, where powder for the Confederate Army was made during the Civil War. In mute testimony of this is the date 1860 carved high on the wall.

The Main Room leads into the Subterranean Room where nature has been lavish with decorations. Here the walls are delicately-tinted with stalactites and eery calcite deposits form a mural as beautiful as any conceived by man.

In the Boulder Grotto is a ten-ton rock crystalized to the wall—with absolutely nothing supporting the base of the boulder.

Leading from the Chandelier Room—so called because of the elaborate stalactites hanging like chandeliers from the ceiling—is a tunnel about 2,000 feet long. This passageway eventually opens into a room half a mile long, reminiscent of the ancient catacombs of Italy. This room has softly-tinted ceiling and walls of gray, white and warm brown formations.

Formations Grotesque and Weird

Some of the formations are grotesque and weird, representative of animals and people—truly a fairy land where the imagination can run riot in fanciful creations.

Longhorn Cavern, estimated by geologists to be 15 million years old, is largely the result of rainwater simply entering the surface and seeping through the crevices and faults to lower levels. But in the course of its descent a chemical reaction followed by which acids picked up by rainwater broke down the limestone and carried it away in solution to be later deposited in the form of flowstone and long-pointed and columar stalactites.

It is through this constant erosion and chemical breaking down of the limestone that large fissures are opened which frequently result in huge underground river channels. Longhorn Cavern is one of these typical underground river channels which was carved through countless ages of roaring torrents that once flowed through the cave.

Such are some of the wonders to be seen at Longhorn Cavern to the extent that it is known today. Already the third largest cave in the world, further explorations may prove it to be as great in size and magnificence as the Carlsbad Cavern of New Mexico.

Independent Vote Seen As Decisive

A NATION-wide test by the American Institute of Public Opinion indicates that neither the Democrats nor the Republicans possess sufficient "regular" party members at this time to capture the Presidency, according to Dr. George Callup, the institute's director.

"Whichever party wins the election next November will probably owe its victory to the so-called 'independent vote,'" Dr. Gallup reports.

"Both Roosevelt and Willkie have indicated that they will appeal to the independents, and since the size of this group shifts from time to time the American Institute will measure sentiment on the question throughout the campaign.

"At the present time, the latest Institute survey shows, one voter in every five considers himself free of regular party allegiance. Voters in a cross-section of the forty-eight States were asked: 'In politics do you consider yourself a Democrat, Republican, Socialist or Independent?' The answers were:

Democrat	41%
Republican	38
Independent	20
Socialist and other	1"

Metal for Airplanes Found in Sea Water

The development of a huge plant on the Gulf of Mexico at Freeport, Texas, for the extraction of the metal magnesium from sea water has been announced. More than 5,300 short tons of magnesium came from producing plants and stocks in the United States in 1939 to meet the swiftly growing demand for the lighter-than-aluminum metals, classed as an essential material by the Army and Navy Munitions Board. This was a greater quantity than the total American production of both 1937 and 1938, says a bulletin of the National Geographic Society.

Chemical engineers have estimated that every cubic mile of ocean water contains 5,700,000 tons of magnesium, which occurs in the ocean as a compound (magnesium chloride) in solution. The Texas plant under construction will be able to suck in 12,000,000 gallons of sea water daily for treatment. A cubic mile of sea water will provide enough magnesium to keep the plant working at capacity for 800 years, according to the bulletin.

Lightweight castings of magnesium and its alloys are of great and growing importance in aircraft and other industries where minimum poundage and maximum strength are essential.

New Defense for Alaska

The Navy took steps to improve the Alaska defense opposite Russian territory by awarding $4,305,000 in contracts for work at naval air stations on Kodiak and Unalaska islands.

The action came less than two weeks after a Coast Guard cutter confirmed reports that a Russian air base was being developed on Soviet-owned Big Diomede Island. A syndicate of three companies already engaged in constructing the air station at Kodiak Island in the Gulf of Alaska received the order to begin preparing aviation facilities at Unalaska Island, first big link in the American defense of the Aleutian islands which string down and out from the southern tip of Alaska. To the same syndicate was awarded additional work under its contract at Kodiak.

41,000 Hold Pilot Rating

Airplane pilot certificates were held by 41,000 individuals in the United States July 1, as compared with 26,144 a year earlier, Donald H. Connolly, Administrator of Civil Aeronautics, reported.

About 10,000 boys and girls were graduated from CAA training course and half as many from commercial schools during the year. California, with 5,826 pilots, ranked first in the country. New York State, with 2,371, was in second place.

Demands for flying equipment to match this increased activity gave such impetus to the manufacture of trainers and other types of light airplanes that 2,718 additional aircraft were certificated during the twelve months.

Spy Rings On Pacific Coast, Says Dies

Congressman Martin Dies, chairman of the Congressional Committee on un-American activities, has evidence that both Germany and Italy maintain active espionage organizations in San Francisco.

"I have the names of seven known Italian spies and the names of 20 leaders of the German espionage organizations in San Francisco," he said, after taking testimony on the Pacific Coast from half a dozen witnesses at a secret hearing. Names of the witnesses were not made public.

Dies said he had been told that three maritime unions operating on the San Francisco waterfront and on vessels plying out of this port are controlled by communists. He named these as the International Long Shoremen's and Warehousemen's union, the American Radio Telegraphists Association, and the Marine Cooks and Stewards.

While the rank and file of these unions are not communists, Dies said, they nevertheless are run by communist leaders.

Dies declared that gaining control of such unions is in keeping with communist policy, the plan being to prevent the United States from preparing its national defense and if war should come to have men in positions where they might engage in espionage and sabotage.

Defense Progress

The clear and objective statement of William S. Knudsen, head of the Defense Commission, on the progress of the defense program comes at an opportune time.

It is evident that Mr. Knudsen does not expect any great increase in plane deliveries to Great Britain in the near future. He estimates that plane production in America is at present between 800 and 900 planes per month. Two years will be required, he thinks, to enable the industry to attain an annual productive capacity of 2,000 planes, complete with engines and armor. A good many months will be required to construct and equip additional airplane factories.

Mr. Knudsen has wisely chosen to emphasize the length of time that has to be consumed in preliminary preparations before actual manufacturing of various kinds of war equipment can get under way. Since the work of drafting and designing does not, as he says, attract headlines, the uninitiated public does not realize its importance.

By stressing the necessity of such basic preparation to assure "sound achievement" Mr. Knudsen is doing more to instill confidence in ultimate defense accomplishment than he could by attempting to minimize the difficulties ahead. What the public wants chiefly is assurance that there will be no unnecessary delays in the execution of the defense program.

Our New Sea Queen

A bright note was sounded along New York's harbor waterfront when the new liner "America" steamed in and tied up at the North river piers of the United States Lines. She becomes the queen of our fast-growing merchant marine and is scheduled for a series of cruises in West Indies.

The America has many features which put her in the class of the most modern of foreign boats. Her exterior, with its graceful, rakish hull surmounted by two streamlined stacks give her a distinctive appearance. Her interior has been designed to achieve the utmost in beauty and luxury.

The vessel, strictly American-made, has eleven decks, eight of them given over to passenger quarters, and there are five passenger elevators.

The America is said to be the safest vessel afloat. More than 90 per cent of the ship is constructed of non-inflammable material and she is the first one designed with magnetically controlled fire doors that, operated from the bridge, can shut off any section of the boat in an instant. All partitions and wall-coverings in the public rooms and cabins are made fireproof by the use of "marinite," a new sheathing.

The ship is 723 feet long, 92 feet in beam and 100 feet deep from keel to topmost deck. Her displacement tonnage is 35,440. She has accommodations for 1,202 passengers and a crew of 643.

Reasons Behind France's Collapse

Look Magazine published the following reasons for defeat of France by Germany:

"Political disunity contributed manifestly to the French defeat. France was a democracy but her democracy was progressively corrupted and debased by inefficiency, partisanship, cumbersome technique, sabotage and propaganda. The political parties lost vitality through disunity, and wide coalitions—veering either to right or left—sought to govern the country.

"For two years from 1936 to 1938 Front Populaire, a leftist coalition, held power. Its social aims were admirable, but it was shockingly inept in administration, and the Right constantly sabotaged it. The Front Populaire tried to initiate a great arms program at the same time it lowered working hours and raised wages. It couldn't find enough money.

"Here, too, France teaches us a lesson: Complete full dress rearmament demands sacrifices from everybody. You can't effectively arm a nation which is operating under the capitalist system if at the same time you act to weaken the capitalist structure upon which you are depending for economic support.

"The Front Populaire government was succeeded by a Daladier coalition dominated in large part by a policy of elaborate and extreme caution.

"France under Daladier was frightened of its shadow. In the government were defeatists like the celebratedly timid foreign minister George Bonnet, often accused of Facist sympathies. Not in the government but hovering just outside were rank "appeasers" like Flandin who congratulated Hitler after Munich, and Laval, friend of Mussolini.

"In welcoming Munich the solid and sober citizens who made up the middle class of the now dead French Republic revealed the weakness of morale which after contributed to their defeat. Hating and fearing war after their terrible experience of 1914-18, they were willing to accept any compromise which seemed to assure their precious 'security.'

"The Germans fed like locusts on the ripe harvest of political and moral confusion which permeated France. Their propaganda stimulated defeatism where it already existed, and sought to provoke it where it did not exist. Their propaganda included fifth columnism, espionage and sabotage. Aided by pro-Facists in France, the Germans for years waged a definite warfare against French morale, a psychological warfare that took a tremendous toll.

"In conclusion, the point should be made—and it should be the most obvious lesson of all to the people of America—that democracies are incapable of fighting totalitarian war against a totalitarian State unless they are prepared to match the totalitarians in national unity of effort, discipline and sacrifice."

Times Such As These

In times such as these in which we live, in which scientific progress, human ingenuity, and human action and endurance are so extensively turned to ways of violence and detruction, one cannot help contrasting the world in which God has placed man with what man has done to that world and to himself.

How rich human life might be if, instead of greed and lust and false ambition, men had been willing to enjoy this world and to share all its good things with their fellows! The inventive genius that we have turned to war and violence would have been sufficient to provide enough food and clothing and good habitation for everyone.

If even a small part of the efficient organization that men have created for military ends had been used to organize the life of mankind for peace and for mutual helpfulness, what wonderful changes in the structure and organization of society might have been accomplished.

* * *

Fifth Column Closely Watched

At last, there is an excellent prospect for decisive action to prevent Fifth Column activity in the United States. Following discussion of the problem at the Havana conference, State and Justice Department authorities have agreed that the German and Italian Embasses and Consulates must be firmly warned to watch their steps or look for trouble.

The German consulates in Boston, New Orleans and San Francisco are headed by remarkably important Nazi party members, who are given means to live on a scale far beyond that required for ordinary consuls, and whose presence and purpose in this country need considerable explanation. The truth is that the American government has waited a long time to demand the whys and wherefores of men like Dr. Herbert Scholz in Boston and Captain Frit Weidemann in San Francisco. The period of waiting has now come to an end.

The effort to repress propaganda work by German and Italian agents masquerading as "diplomats" will be made parallel to the similar efforts which the other American nations agreed on at Havana. But the attack on the Fifth Column will also go further.

All groups and societies with known Nazi, Fascist or Communist affliations are now under constant surveillance. Efforts to uncover foreign agents, who have failed to register as the law requires, are being greatly intensified. The Federal Bureau of Investigation is daily increasing the number of its staff charged with preventing industrial sabotage and espionage.

Simultaneously, the system of alien control is being set up as rapidly as possible. The registration and identification of all resident aliens is now under way. Special attention will be paid to the vast number of aliens illegally in this country, and to the 16,000 to 20,000 who are here under temporary visitors' permits. In general, it may be said that more is being done to weed out Fifth Columnists than any one had either imagined or hoped for.

The Duke's New Job

The inhabitants of Bahama Islands professed delight that their former King, the Duke of Windsor, was going to be their Governor General.

Those "in trade" expected him and his American-born duchess, the former Wally Simpson, to do marvels for the tourist business, which has had a bad slump since the second World War.

Not all of the inhabitants knew they were coming, nor did they know that he had once been King-Emperor of a fourth of the globe, the sovereign of 600,000,000 persons, including themselves, and had given it all up for the love of his present duchess.

The duke will get a salary of $12,000 a year.

Nassau, the capital of the duke's new empire, is a small place on the principal island, but it has a Parliament House, where both Edward and Wally will have thrones, as the representatives of the King and Queen of Great Britain.

The climate of the Bahamas is similar to that of the French Riviera, where the duke and duchess have lived much of the time since they left England.

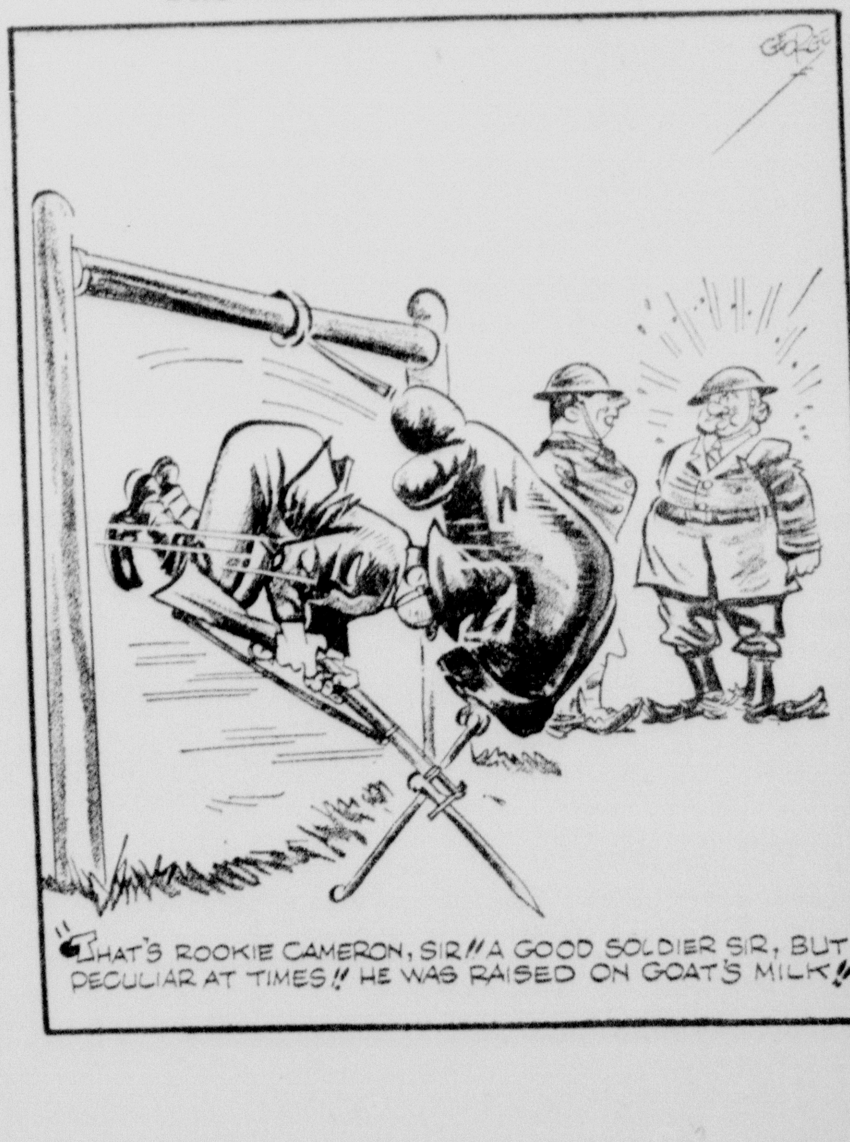
Beware lest any man spoil you through philsophy and vain deceit, after the tradition of men, after the rudiments of the world, and not after Christ. Col. 2:8.

The Great American Home



THAT'S ROOKIE CAMERON, SIR// A GOOD SOLDIER SIR, BUT PECULIAR AT TIMES!/ HE WAS RAISED ON GOAT'S MILK!

Grass Root Reveries

By JOE GANDY

Winnsboro, Texas.

(Copyright, 1940, by the Southwest Magazine Co.)

SEPTEMBER days—saddest of the year—will have a bit of color to brighten up the scene. Fall styles, we are told, will show color in every conceivable shade—from radiant red to gingerbread brown. Millinery will look queer again but not so queer as last year. Women's shoes will continue to have holes in the toe—and that keeps me guessing. Every time I meet a lady with a hole in the toe of her shoe I think she has a sore toe and jump sideways so as not to step on it.

"I ducked—missing the kick about one-sixteenth of an inch."

Men's hats will run to color again and so will men's ties and socks. Wife, hoping to make me look younger, persuaded me to buy a blue hat last year. I still have the hat but it has faded into a pale pink. When I wear it to town the jelly beans look at it and grin. No use trying to make a fledgling out of an old bird. Styles and keeping up with the Jones' cause a lot of misery, yet if we had no styles the women would have nothing to talk about and the men would have nothing to worry about where to get money to pay for the styles.

●

Wife has studied this year's styles with misgivings. Last year she studied styles and made up a list of stylish things to buy, but her list was too long and her money too short. I suggested she make up no style list this year—just trust to luck. She looked peaved and said she had trusted to luck ever since she married me and that is the reason she had nothing fit to wear.

●

At last the primary storm has blown itself out and all is quiet on the political front. I had a good time, attended 29 candidate rallies and shook 1,290 hands. I promised the candidates I would do them no harm and accepted their cigars without conscientious objections. One candidate, who invited me to supper, looked surprised when he paid my check. It was for $1.35. But no candidate should expect an ardent supporter to get up from the table hungry.

●

I saw a man trudging to town the other day with two paper sacks containing vegetables which he had raised and hoped to sell that he might buy some groceries. The same day I read where one of the big movie stars complained that he could barely make ends meet on an income of one thousand dollars a week. It's a funny world, out of balance, no doubt; or maybe the people are out of balance. There are thousands who live on $200 per year each, yet here is one man who can't live on $50,000 a year. Social reforms try to even up social inequalities, and social reforms mean well, but it seems some folks are born to "delve and span and some to be a movie man." I'm a poor manager, but believe I could make ends meet on $50,000 a year.

●

Necessity is the mother of invention and invention often the mother of necessity. Leastwise, it is so with one of my neighbors. When times got hard he turned to inventing as a side line. However, some of his inventions are fantastic. For instance, the invention he thinks most of is a formula to rid dogs of fleas. The stuff is so hot, he says, that one drop on a dog's back will make the dog jump from under the fleas. When told that would hardly solve the problem; that the fleas, still alive, would hop on the dog again, he said: "There's the big idea—the dog owner will buy more of my flea remedy to get rid of more fleas. Repeat orders will make me rich." And he was serious about it. That set me to thinking that maybe the reason some of us don't cash in on our ideas—be they ever so fantastic—is because we are not serious enough about them.

●

While sitting alone on the front porch one night listening to the owls hoot and the whippoorwills cry my mind went back to camp-meeting days when people came from miles around in wagons and buggies to spend a week together in prayer and gospel singing. These people had faith in God Almighty and His promise of eternal salvation. They were honest, hard-working folk with hearts full of gratitude for temporal blessings. I wonder if we today have the faith of our forefathers. Theirs was a beautiful faith, sincere and reverential, a faith that never doubted, never faltered.

●

The government is now writing life insurance for mules in some of the States. It is sponsored by the FSA. Amount of the policies is based on the valuation of a mule appraiser. Most policies written are from $100 to $125 a head. The government ought to go a step further and insure the lives of men who handle mules. No man's life is safe around a mule. I have known several men who were killed by mule kicks. Once I owned an unsophisticated gray mule, blind in one eye. I used to approach him on the blind side, but one day I got careless and approached him on the other side. He let go with all he had—and I ducked—missing the kick about one-sixteenth of an inch. Ever since I have had a profound respect for the business end of a mule.

●

The Maharajah, of Mysore, India, wealthy ruler, died recently at 56. He was reported to be worth $400,000,000 and owned 80 automobiles. I don't known what use a man has for 80 automobiles. He can ride in only one at a time. If I had 80 automobiles there would be 79 standing around idle for want of gas, oil and parts. The upkeep of one old flivver has me broke most of the time.

BRIEF TEXAS NEWS---from Over the State

DEATHLESS TRAFFIC RECORD

Sixteen Texas cities had deathless traffic records for the first seven months of the year, the Public Safety Department announced.

24-POUND METEORITE

WPA workers found a 24-pound meteorite in Ector county. It was the fragment of a much larger meteorite that fell in that vicinity many years ago.

KILLED BY FALLING TREE

Robert Crabtree, Miller county woodcutter, was killed instantly when struck by a tree he was felling near his Fouke, Ark., home, fifteen miles south of Texarkana.

WHALE STRANDED ON COAST

A whale, 70 feet long and estimated to have weighed 50,000 pounds, stranded and died when it got in shallow water near Velasco on the Gulf coast.

SEWING VETERAN OF FOUR WARS

Mrs. Mary Elizabeth Anderson, of El Paso, age 92, has sewed for soldiers of four major wars. She is now working on a piece quilt for the Red Cross.

DUCK SEASON OPENS EARLIER

The Game, Fish and Oyster Department has notified hunters that the opening of the duck season for North Texas will be November 2. Last year the season opened November 16.

GIANT HOG

Carl Gerber, farmer, near Donna, (Hidalgo county), claims to have raised the largest hog in the world. It is a Duroc Jersey and weighs 1,300 pounds. Gerber bought the animal in Minnesota when it was a mere pig.

"HEAD-ON" COLLISIONS INCREASE

Of the 766 traffic fatalities from January through June of 1940, 22.7 per cent were "head on" collisions between autos, trucks and trains, a 16 per cent increase over 1939.

ALLIGATOR FARM

Palestine Press: "Raising pet alligators is the hobby of A. L. Jenkins, Palestine store owner. Mr. Jenkins has a veritable alligator farm in his own back yard. Since he got his first alligator, two years ago, Mr. Jenkins has increased the collection to four, and will add others as he is able to get them.

INCOME TAX RETURNS

Texas residents filed 210,543 individual income tax returns during 1939, on which a total income tax of $28,144,000 was paid. Texas ranked 9th among States of individual tax returns filed during the calendar year of 1939.

NO ADS ON MONEY

Leo J. Williams, agent in charge of the Dallas secret service office, said persons who put advertising stickers on coins or currency of the United States are violating the law. Stickers have been placed on money in Dallas and in Abilene, Williams added.

STATE-OWNED LAND GIVEN RAILROADS

Sweetwater News: "A total of 32,153,360 acres of State owned land was given to railroads for building lines in Texas. About 84 per cent of these lands were located in West Texas. The railroads built 3,627 miles of road for this amount of land."

TEXAS A SOURCE OF WAR MATERIALS

Discovery of undetermined quantities of wartime minerals in a serpentine mass stretching across Blanco and Gillespie counties was reported by E. P. Sellards, University of Texas geologist. The metals are chromite, chromium oxide, nickel and magnetite.

BOY, SCOLDED, KILLS HIMSELF

Houston Chronicle: "Joe Doran, of San Antonio, age 13, wanted a ball. He took 25 cents from his father without permission to buy one. The father, Bus Driver Nicholas Doran, scolded Joe for taking the money. 'I don't want to live any more,' the boy sobbed to his mother. A few minutes later the mother found Joe dying of a pistol wound. Justice of the Peace O. L. Wiley said it was a case of suicide."

LAST SURVIVOR OF HISTORIC BATTLE

E. D. Harrington, last survivor of the historic Packsaddle Indian Battle on Packsaddle Mountain, in Llano county, died August 5 in Pantano, Arizona. The engagement was fought August 5, 1873.

VICE-PRESIDENT GARNER BUYS THIRD RANCH

Vice-President Garner has purchased the 9,600-acre Deakley ranch, near Dilley, (Frio county). This is the third ranch the Vice-President has acquired in the past three years.

BIBLE REMAINS BEST SELLER

Regardless of "Gone With the Wind," and other popular fiction sellers, including war books, the Bible remains the best seller with Beaumont readers, said Mrs. Alex Szafir, manager of a local book store in that city.

"When death and destruction come, people invariably turn more to the Bible, both for solace and to trace its prophesies," she added.

TALCUM POWDER FROM FLOWER SEED

Liberty Vindicator: "A new and valuable product emerged from the Romayor, (Liberty county), Chemurgy laboratory. It is a fine-textured, snowy-white talcum powder. The powder was made by chemurgy students from pulverized four o'clock seed and is very similar to commercially sold powder."

THE LITTLE BLACK HEN

James W. West, of Fairbanks community, (Harris county), is proud possessor of a little black hen which he says, has lived to the ripe old age of 21 years. "The health of the hen has been good and her egg production remarkable," said West.

SIX SETS OF TWINS

A record for multiple births was established by Mr. and Mrs. Buren E. Hamm, of the Estelle community, (Dallas county), when the sixth set of twins was born to them recently. They now have 15 children, all living.

COURSES IN AUTOMOBILE DRIVING OFFERED PUBLIC SCHOOLS

Texas junior high schools will offer courses in automobile driving next fall, said R. B. Rice, supervisor of traffic education. He urged redoubled efforts in establishing local safety councils throughout the State.

CATCHES ALLIGATOR WITH HOOK AND LINE

Dilley Herald: "Ward Williams, of Dilley, (Frio county), made an unusual catch while fishing in the Nueces river about 18 miles south of Cotulla. He caught an alligator 5 feet in length with a linen line and a hook 1½ inches long. He 'worked' with the 'gator more than half an hour, finally towing it to shallow water, then to the bank, where he killed it with a green pole."

LARGEST MAMMOTH TUSK KNOWN

The American Museum of Natural History has given George Doughty, merchant of Post, (Garza county), credit for finding the largest mammoth tusk known. It is 16½ feet long, two feet in circumference at the largest part and when boxed weighed 600 pounds. Doughty's hobby is the collection of prehistoric animal bones. His most recent find was the leg bone of a mammoth 40 inches long.

ROAD DEATHS HIGHER

State police reported traffic death toll of 766 throughout the State during the first half of 1940 was 8 per cent higher than last year. The 8 per cent represented 54 lives.

TEXAS SALT EXPORTED

The first cargo of salt to be exported in considerable quantity from Texas was loaded aboard the Yugoslavian freighter, Vid, at the Houston port. The salt was consigned to Japan.

SHERIFF 33 YEARS

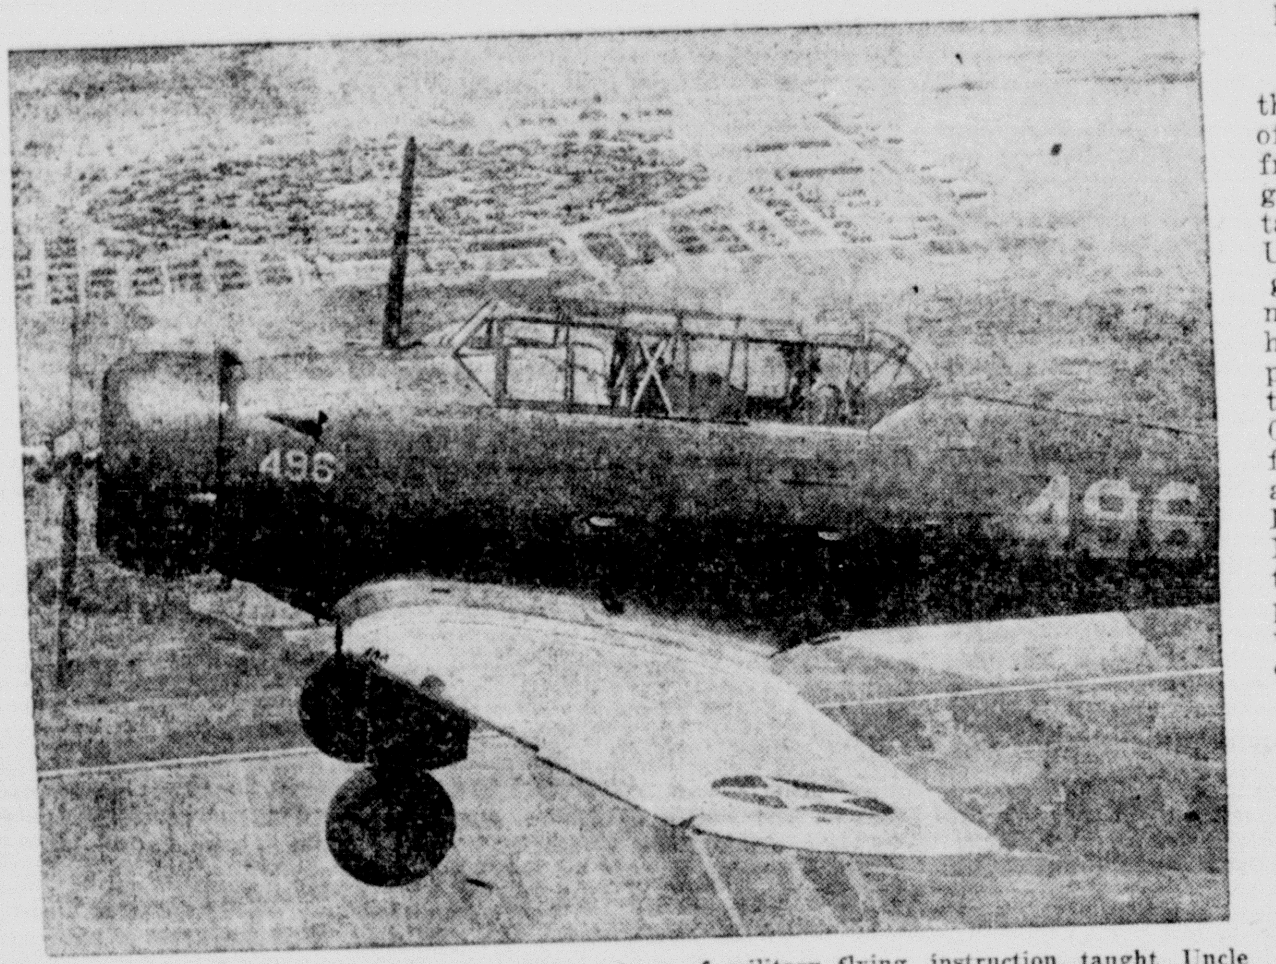
Sheriff J. S. (Sid) Talley, guardian of the law in the Texas Panhandle, has started his seventeenth consecutive term and thirty-third year as Ochiltree county sheriff.

CHIGGERS KILLING YOUNG QUAIL

Chiggers are killing thousands of young quail in East Texas, said Calvin Hinson, Palestine hunter. Young quail found on Hinson's own farm were infested with chiggers and near death, he reported.

"FIDDLINGEST FIDDLER"

Eck Robertson, of Panhandle, Texas, "the fiddlingest fiddler who ever fiddled," has an orchestra composed of his children and grand-children who can carry on when Eck is finished. He has been fiddling—mostly in Texas but actually around the world—for a half century and has won many fiddling contests.



FLEDGLINGS MUST FLY BLIND—Important phase of military flying instruction taught Uncle Sam's flying cadets, is pictured above as student undergoes test under hood at Randolph Field, the "West Point of the Air," in Texas. Instructor watches at rear.

"CAVALCADE OF TEXAS" FILM SHOWN AT WORLD'S FAIR

The Texas Clubs and the New York Southern Society were joint sponsors of "A Cavalcade of Texas," a film version of the Lone Star State, shown in the Science and Educational Building at the World's Fair in New York City.

FARM GROUP BOYS BUILD HOME

Lufkin News: "'Training by doing' is the goal of 124 farm boys of Nacogdoches county, who are building themselves a home out of native pine timber on a 2,500-acre tract along the Angelina river in the East Texas country, from which they will conduct agricultural activities. Cattle, hogs, poultry, sheep, goats, horses and mules will be bought for the young agriculturists, who then will handle affairs themselves on a cooperative basis."

$6,500,000 PLANE FACTORY

North American Aviation, Inc., of California, has begun construction of a $6,500,000 airplane factory between Fort Worth and Dallas, near Grand Prairie. The factory site is a tract of 140 acres adjacent to Hensley Field, an army airport, on the old Fort Worth-Dallas pike. Three types of planes will be produced: Trainers, fighters and bombers. It is estimated that the factory, when completed, will turn out 300 planes monthly and employ 12,000 persons.

BEST LOOKING GIRLS FROM TEXAS

The Atlantic City, N. J., Chamber of Commerce was informed by Billy Rose, the theatrical producer, that the best looking girls in the United States come from Texas.

MAINTENANCE COST OF EACH CONVICT

The annual report of the Texas Prison Board shows that the maintenance cost of State convicts in 1939 was $95.63 each.

BURIED IN COFFIN HE MADE 15 YEARS AGO

William Specht, age 81, Bulverde (Bexar county) merchant, was buried in the family plot at Bulverde in a coffin which he made for himself fifteen years ago.

WOULD CARE FOR 40 ENGLISH CHILDREN

Merkel Mail: "Application to bring 40 English children to Bosque county for care, schooling and protection has been made by Barney Carter, Tyler oil man and owner of the Kimball Bend farms, near Kopperl, (Bosque county)."

MILITARY ROADS ALLOCATION

The Federal government, at the request of the War Department, has allocated $2,200,000 for construction of three roads in Texas of strategic military importance. Texas already had 6,000 miles of military roads.

HELIUM PLANT OUTPUT

The plant for the extraction of helium gas from natural gas and maintained by the United States government near Amarillo, has just completed the extraction of 100,000,000 cubic feet of helium, according to the Bureau of Mines. This is the only helium plant in the world now in operation.

SOUNDED FAMILIAR

Sherman Democrat: "After riding in an ambulance with its siren screaming, an English seaman, victim of a hit and run driver, turned dazedly to hospital attaches with the question:

"'Is the air raid over yet?'

"He had experienced numerous air raid siren warnings in England."

OFFICE SAME SPOT WHERE BORN

Forty-five years ago Dean Gauldin was born in a tiny apartment above a drug store at 505 Main Street, Dallas. Next January Gauldin, as Dallas county's new District Attorney, will move into offices at 505 North Main Street, Dallas, where the County Criminal Courts building now stands.

U. OF T. STUDENTS FAVOR COMPULSORY MILITARY TRAINING

A 5 to 1 majority of University of Texas government students favor compulsory military training. In a poll taken by Dr. C. A. Timm, university government professor, the vote registered 218 out of 264 students in favor of conscription on a selective basis, Timm said.

EVIDENCE OF EARLY MAN

Van Banner: "The finding of a Folsom point in a mound being uncovered at the Fred Yardbrough farm, east of Grand Saline, (Van Zandt county), presents evidence to the archeologist in charge of the digging that an ancient race roamed the Sabine river bottom thousands of years ago, long before the coming of the red man."

TEXAS LEADS IN RECRUITING

Texas has been the leading State in securing of recruits for the United States Army, according to Army staff recruiters.

PLAGUED BY INLAWS

A 90-year-old negro, of Houston, was granted a divorce when he complained to Judge Ben Wilson that he was plagued by inlaws.

INTANGIBLE VALUATION

State Comptroller George Sheppard announced the intangible valuation of Texas railroads for 1940 as $31,623,000, a decrease of $100,000 from last year; oil pipe lines, $47,267,100, an increase of $1,132,620, and toll bridges, $200,000, unchanged.

WOMAN TRAIL-DRIVER DIES

Mrs. Adna Smith Eichhorn, age 81, said to be the only woman who went up the Texas cattle trail twice, died at her home in San Antonio, August 10. She was a member of the Old Trail Drivers Association of Texas and was crowned queen of the organization in 1936.

PEDALED 1,025 MILES TO HEAR WILLKIE SPEAK

Johnny Stout, of Fort Worth, 17-year-old admirer of Wendell Willkie, Republican nominee for President, rode his bicycle to Elwood, Ind., 1,025 miles, to hear the formal acceptance speech of Mr. Willkie.

FIG TREE 40 FEET HIGH

A fig tree, 40 feet high, is growing in downtown San Antonio. Planted by a pioneer family, its age is unknown but horticulturists estimate it to be at least half a century old. The tree is of the Smyrna variety.

BERMUDA GRASS BEST

Chemical analysis of 1,432 samples of various grasses growing in East Texas, made by the State Agricultural Experiment Station, revealed that bermuda grass topped all others in protein content, which ranged as high as 8 per cent in spring months. Johnson grass was second.

WOOL CROP SETS NEW RECORD

The United States Agricultural Marketing Service estimated Texas' 1940 wool crop at 83,648,000 pounds—an all-time record. The service said the current crop would exceed last year's by 6,358,000 pounds and was 21,668,000 heavier than a 10-year average prior to 1939. Estimated number of sheep and lambs shorn or to be shorn this year was placed at 10,527,000 as compared with 9,844,000 last year.

PUPILS PAYING TUITION WITH MOSS

Liberty Vindicator: "Students in the Romayor, (Liberty county), school help to pay their tuition by gathering and selling moss. The moss is pulled green from trees and sold to D. E. Hudgins, local warehouseman, who processes it and resells it to Eastern manufacturers. The moss is used for padding in upholstery and as a filter for air-conditioning in units.

PROPERTY LOSS INVOLVING AUTOS AND TRAINS

El Paso officials of the Southern Pacific railroad say that although large sums have been spent by the company to protect its grade crossings with wigwags, flagmen, gates, lights, and warning signs, the railroad was forced to spend $37,297 last year for repairs to locomotives, other equipment and right-of-way damaged in crossing collisions with autos and trucks.

EATS ONLY BREAD, CRACKERS AND CEREALS

Orange Leader: "Francis V. Davis, age 34, of Dallas, has never eaten meat, vegetables or fruits. 'I don't like their odor,' he explained. The former Carrollton, Ill., man said his diet, since he cut his milk teeth, has consisted of bread, crackers and cereals. 'I have never used a knife and fork,' he added. Apparently in perfect health, Davis weighs 195 pounds and is 5 feet and 9 inches tall."

SYRUP FROM WATERMELONS

Watermelon syrup, a new table delicacy, is being made from East Texas watermelons in a plant one and a half miles south of Athens. F. M. Lockaby is originator of the syrup and owner of the plant. Ten gallons of watermelon juice make one gallon of syrup, which is of deep red color and fine flavor.

SNAKEBITE FATAL

Juslius Tatsch, age 70, Gillespie county ranchman, died recently from the bite of a rattlesnake.

A LITTLE FUN *Jokes to Make You Laugh*

In the Push

"Fred," said the teacher to a boy who was behind in his class, "you are always behind; you should have more push."

"How can I push," said Fred, "if I'm not behind?"

Strictly Business

I'm awfully sorry that my engagement prevents my attending your charity concert, but I shall be with you in spirit."

"Splendid. And where would you like your spirit to sit? I have tickets here for 50 cents, $1 and $2."

A Big Help

Panting and perspiring, two Irishmen on a tandem bicycle at last got to the top of the steep hill.

"Thot was a stiff climb."

"Sure an' it was thot. Ef I hadn't kept the bloomin' brake on, we would have gone backward."

Out of the Suggestion Box

An employer called his men together to place before them plans for bettering working conditions.

"Now, whenever I enter the shop," he said, "I want to see every man cheerfully performing his task, and therefore I invite you to place in this box any suggestions as to how that can be brought about."

A few days later he opened the box and took out a slip of paper containing this message: "Take the rubber heels off your shoes."

Pa Stumped

Charles: "Pa, what's the difference between sitting up and sitting down?"

Pa: "Well, my boy, when somebody is standing up, and he seats himself, he sits down; and when he doesn't go to bed, and sits down, he sits up."

Charles: "But, pa, if he sits, how can he sit without sitting down? And if he sits down, how can he sit up?"

Pa: "Well, you see, if he sits down, why he—I mean if he sits up—oh, go to bed and don't ask me questions when I'm busy reading."

A Dog's Life

"Little boy, do your dogs have licenses on them?"

"Yes, sir! They're just covered with them."

Labor-Saving Idea

Mom: "Yes, I've had my hair permanently waved. Why do you ask?"

Sonny: "Well, I was just thinking, why can't I have my neck permanently washed?"

So Soulful, Too

Madge: "I wonder why the Air Corps turned Harold down?"

Myrtal: "I heard it was on account of his eyes."

Madge: "Surely not, I think he has lovely eyes."

City-Bred Nephew

City nephew (watching his uncle carry in a sack of feed): "What's in there, Uncle John?"

Uncle John: "Shorts for the pigs."

City nephew (with surprised look): "Why, Uncle, I didn't know pigs wore shorts."

One Dissenter

Speaker: "I certainly am pleased, ladies and gentlemen, to see such a dense crowd here tonight."

"Don't be too pleased," said a voice from back of the hall. "We ain't all dense."

Be Patient

Daughter: "My gosh! It's one o'clock and mother has me locked out!"

Guest: "How in the world will you get in?"

Daughter: "There's nothing to do but wait here on the porch until she gets home."

Cash and Carry

"Henry, I thought you told me that your bank loaned money on notes?"

"So it does, dear. Why?"

"Well, it doesn't. I sent the maid down there with a note telling them I wanted to borrow $100 and they wouldn't give it to her."

Johnny Was Right

Teacher: "Johnny, what is a cannibal?"

Johnny: "I don't know."

Teacher: "Well, if you ate your father and mother what would you be?"

Johnny: "I'd be an orphan."

All the Symptoms

New Father (admiring his first-born): "I tell you, he's going to make a great politician."

Mother (surprised and hurt): "Why how can you say that?"

Father: "Why just listen to him. He babbles all kinds of things and they sound wonderful but mean absolutely nothing."

Narrow Escape

"Gosh," said the reckless driver, as he slowed down the automobile from 70 to 10 miles an hour, "look at that wonderful scenery down in the valley. Ain't you glad you are alive?"

Nervous Passenger: "I certainly am."

Gardening Hazards

"Did your garden do well?"

"No; every time my husband started digging, he found a lot of worms, and then he would quit digging and go fishing."

Obliging Willie

Grandma: "Willie, I wish you would do something for me. I wish you would promise me to quit using so many slang words—two in particular—one of them is 'swell' and the other is 'lousy.' Would you promise me that?"

Willie: "Why, sure, granny. I'll promise not to use those two punk words again."

Tit for Tat

Dorothy: "A little bird told me what kind of a lawyer your father is."

Evelyn: "What did the bird say?"

Dorothy: "Cheep, cheep."

Evelyn: "Well, a duck told me what kind of a doctor your father is."

Dorothy: "What did the duck say?"

Evelyn: "Quack, quack."

Poultry News *Poultry House Trapnesting*

Get the Poultry House Ready

It's a good idea in September to start to slick up empty pens and houses. Give the pullets a break and a chance to pay their board by scrubbing and thoroughly disinfecting the house. If mites are thriving in cracks and under the roost, now is the time to get rid of them before they have a chance to start their dirty work.

Handle Pullets Individually

The best way to select pullets for the laying house is to catch them up and handle them individually. This gives an opportunity to mark the best ones with different colored leg bands and to cull them thoroughly. At this time, anti-pick devices may be applied if any trouble with cannibalism has been observed, and a worm treatment may also be given.

Five Leading Western Poultry States

The five leading western poultry States, according to the 1938 values as estimated by the Department of Agriculture are in order as follows: Iowa, California, Texas, Minnesota and Missouri. The total value of poultry and eggs produced in these five States is more than $335,000,000.

Banding for Trapnesting

For flock owners who have become interested in breeding work to the extent of trapnesting a flock of pullets beginning this fall, a few suggestions about the actual process of leg-banding may be welcome. In the first place, it is best to use a definite system of banding to make it easier in handling the birds when recording eggs at the time of trapnestng. It is a good plan, for example, to place the legband on the same leg of each bird, as, for example, on the right leg. It is also a good plan to place the legband on so that the numbers are upside down when the bird is standing. Thus when the bird is removed from the trapnest, with her head toward the body of the person removing her, the band will always be found on the right leg and the number will be easily read at a glance. A definite system of banding saves considerable time for the attendant and the bird is handled more easily.

About Turkeys

It is a good plan to start now to look around for a good place to market the turkey crop. As soon as some of the faster growing and earlier turkeys show market maturity, even if you are not yet ready to market, it is a good idea to start disposing of as many locally as possible. Every turkey sold locally can be made to mean a profit of 50c to $1.00 extra and a little earned for dressing and getting ready for the oven. Nothing sells turkeys to the housewife so much as letting her know that all she has to do when she gets it is to roast it and carve it. Many a turkey can be sold from now to Thanksgiving with an advertisement in the classified section of the local newspaper.

If at all possible, attend a turkey grading school this fall. These schools are put on in different parts of the country by the U. S. Department of Agriculture and also by the colleges of agriculture of many of the States. Demonstrations in the killing and dressing and grading of turkeys are put on by experts. Much valuable information can thus be gained.

The Battle of Britain

(Continued from 2)

a carrier. This fact, coupled with the complete dislocation of the British carrying trade, poses problems of increasing seriousness.

On the other hand, German and Italian shipping is still largely bottled up by the British blockade; supplies from overseas points are largely cut off; others, formerly carried by sea, must now be shipped over circuitous and inadequate land routes.

There are unquestionably grow- shortages of various kinds in all the belligerent nations, and these shortages will probably tend to increase the longer the present type of warfare continues. The war of attrition and blockade is thus still a threat to both sides.

Mediterranean-African War

The defeat of France, with creation of what amounts to exposed British flanks in Africa, complicated the British Mediterranean-African strategy. The first fruit of the French defeat was the Italian conquest of British Somaliland, unquestionably the first step in an Italian attempt to close the Suez Canal-Red Sea-Aden route, and thus isolate British naval, air and land forces in the Eastern Mediterranean area.

The British position in the Mediterranean and in Africa, though weakened by the French defeat and the small Italian conquests, is not essentially changed. Italian strength is superior in the Central Mediterranean, the British at both ends. The Italians have attempted to neutralize Malta and Gibraltar as naval bases by bombing raids. Malta, because of its proximity to Italy, is probably useless except as a base for small craft and perhaps a few submarines, but Gibraltar is apparently still being used as the base of British Western Mediterranean forces, though drydock repair to large ships are probably being done in England rather than at Gibraltar.

Italy, therefore, still feels the clutch of British sea power upon the Mediterranean; Britain still controls the important oil wells of the Near East and even disputes with Italy the routes through the Algean Sea toward the Dardanelles.

As for the war in general, the timetable of Nazi conquest seems to have undergone alterations and modifications since the early summer. The delay in launching the long-expected full-scale blitzkrieg against England has undoubtedly given Britain a much-needed breathing space and has strengthened the psychological, as well as the military, resistance of the country.

Aims Uncertain

But it is premature to draw conclusions. Surprise is an important element of all German military operations; we can be certain that the war will yet develop its share of surprises.

It is not yet even certain whether Hitler has determined upon invasion, attrition or simply a terrific aerial blitzkrieg designed to crush the will of England to resist. The operations to date could be preliminary to any one of these campaigns. Of late German attacks upon British airfields, British bombing of German-held ports and shipping and coastal points, and the bombardment of the Dover coast by long-range guns on the French and Belgian Channel coasts, seemed to indicate preparedness for actual invasion.

But the British Navy still sails the seas; its bases have not been reduced, its strength has not been neutralized. And the Royal Air Force is still strong. The Nazis do not seem to have established any clear-cut aerial supremacy above England, or in the waters around England, and that is the first essential to German victory.

Unquestionably the German plans have required time for development and execution. But the September equinox and the bad weather of the fall are approaching, which must handicap air operations.

Set for Action

Germany's preliminary moves have been accomplished. The Battle of Britain has completed its more or less experimental, or reconnoitering, stages. The war at sea is continuing at a steady pace, with German raiders, motor torpedo boats and minelayers prepared for continuation of the sea struggle. In the Mediterranean, the stage is set for a drive against the Suez Canal and perhaps against Gibraltar. Britain must foil those drives, not so much in order to avoid defeat, but because she must retain control of at least the Eastern Mediterranean if her blockade of the continent of Europe is to have any considerable effect.

It must be remembered that German strategy in this war is to strike at the British Empire, root, trunk and branch. Thus events in Egypt may finally have as much importance as direct assault upon England. But the empire is now girded and growing in strength, as what appears to be another climax of the war approaches.

While directing the defense of Britain against the Nazi daily attack from the skies, the Air Ministry announced that long-range Royal Air Force bombers again had struck at vital military objectives in Germany, in Italy and in German-occupied territory.

HIGH COST OF BEAUTY

"Women in Texas spend more than one-half million dollars a week to make themselves more beautiful," said Clyde Harding, of San Antonio, president of the Texas group of National Hairdressers' and Cosmetologists' Association, which will hold its annual convention in San Antonio, September 29 to October 1. More than 10,000 of the leading beauticians in the United States are expected to attend the convention.

According to Mr. Harding, there are nearly 8,000 beauty shops in Texas, ranging from a room in the owner's home to modernistic shops occupying whole floors in modern office buildings. Each shop is licensed by the State, and the official Texas figures show there are 24,000 accredited operators in these establishments. The investment in equipment runs between $4,000,000 and $5,000,000.

"The business of making women more beautiful is one of the oldest in the world," said Harding, "and in modern times it has become one of the largest businesses in America. There are more than fifty accredited beauty culture schools in Texas, with an additional dozen teaching negro operators. Each student must spend approximately 1,000 hours learning the trade—divided into periods spent on hairdressing, various types of waves, manicuring and forms of facial massage."

300 INDIAN TREATIES

All told, the government has made 300 treaties with the Indian nations. Practically all of these contain the famous phrase, "as long as the rivers shall run and the grass shall grow," which was inserted to convince a simple people that when the government said "forever," it meant it.

"IT'S THOSE EXTRA MILES PER HOUR THAT COUNT WITH ME"
says WILBUR SHAW—
3-Time Winner of the 500-Mile Speed Classic
"AND IT'S THOSE EXTRAS OF SLOWER BURNING I LIKE ABOUT CAMEL CIGARETTES"

SLIPPERY TURNS at 120 miles per hour! Hub to hub duels at 150! For 500 blistering, nerve-wracking miles —laboratory equivalent of 50,000 normal highway driving miles. Yes, it's America's most thrilling classic of auto speed. It's also a proving ground of your safer and more efficient car of tomorrow. For the aerodynamic design, high-compression motor, alloy pistons, the safety glass of your car today had their testing at the hands of these daring men. And, three times, Wilbur Shaw (*above*) has come through with the extra degree of mechanical perfection—the extra daring and extra skill—that wins. He *has* the "*extras*"... he *appreciates* the extras ... in cigarettes, too. Camels give the *extras*. Wilbur Shaw smokes Camels.

CAMELS BURN SLOWER AND GIVE ME THE EXTRA MILDNESS AND EXTRA FLAVOR I WANT FOR STEADY SMOKING. AND, OF COURSE CAMELS GIVE ME EXTRA SMOKING

WITH WILBUR SHAW—with millions of others —the "extras" in slower-burning Camels are the difference between just smoking and smoking pleasure at its best. Cigarettes that burn fast, burn *hot*. And excess heat destroys flavor—makes your smoke flat, harsh. Light up a Camel ... the *slow-burning* cigarette of costlier tobaccos ... and get the "extras"—*including extra smoking* (see right).

EXTRA MILDNESS
EXTRA COOLNESS
EXTRA FLAVOR

In recent laboratory tests, CAMELS burned 25% *slower* than the average of the 15 other of the largest-selling brands tested—slower than *any* of them. That means, on the average, a smoking *plus* equal to

5 EXTRA SMOKES PER PACK!

Smokers: SAVE THE COST OF THE STATE CIGARETTE TAX

Smokers who live in communities where certain state cigarette taxes are in effect can save the cost of the tax—and, in some instances, more—through smoking Camels. (*See panel above.*) When you are a *Camel* smoker, you get this unique economy—and all the extra enjoyment of cooler, milder smoking—the fragrance and delicate taste of finer, more costly tobaccos.

TEXAS FARM NEWS REPORTS

Texas is one of the principal honey-producing States of the nation, having a total of 234,053 beehives on 34,105 farms which produced a total of 4,726,363 pounds of honey last year.

Judging from preliminary reports of AAA supervisors who have checked compliance in 49 Texas counties, there are more gardens on Texas farms and ranches this year than ever before.

Despite the fact that Texas has more varieties of native grapes than any other State, and the soil and climate of Texas is better adapted than any other State for the culture of grapes, this crop has never been established on a large commercial basis.

In addition to the State Fair of Texas Dairy Show this fall, there are 23 spring dairy shows held in other parts of the State. These shows are gradually educating farmers to the value of improving their herds and milk quality.

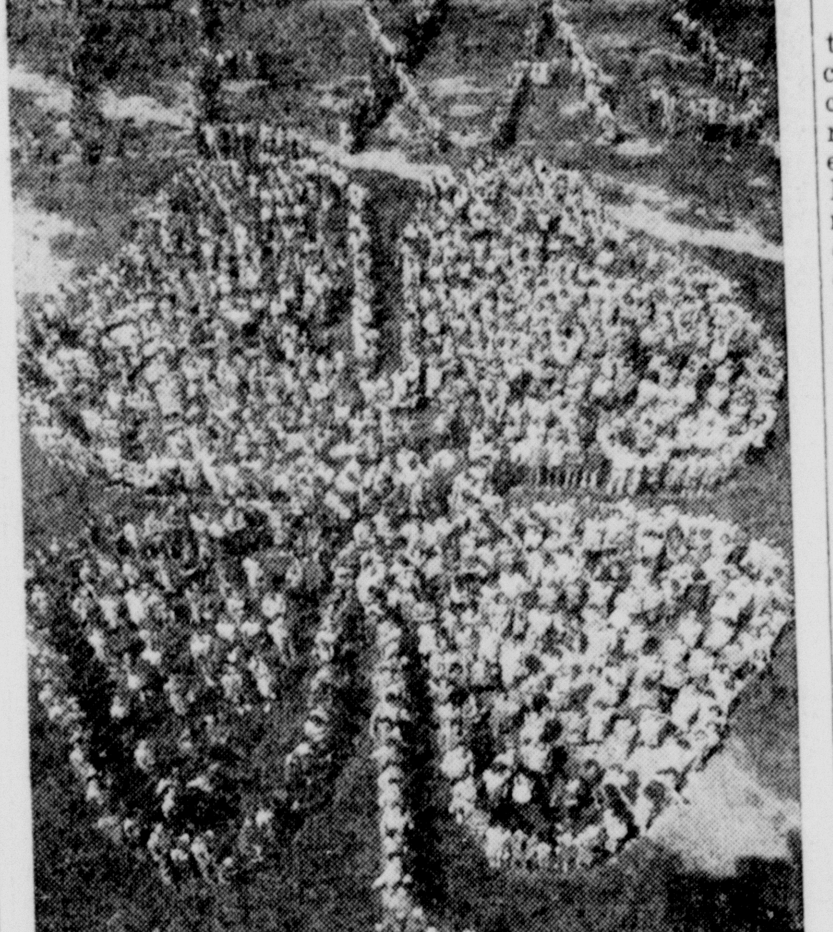
Many of the stockmen in the Pettus, (Bee county), section are worrying over pink eye among their cattle. Some have reported they have a few head that have lost their eyesight entirely. Experienced cattlemen say that the disease is the worst they have ever known.

The humble Texas sweet potato could become a vital source of cellulose for manufacture of bombs, hand grenades and other high explosives in wartime, Gilbert Wilson, instructor in chemurgy at the North Texas State Teachers' College, has announced. The sweet potato starch will produce cellulose 15 to 25 times faster than yellow pine, according to Wilson.

Hansford county producers for the second straight year raised more certified wheat than any other county in Texas. The certified Turkey Red wheat produced in the county showed exceptionally good yields. Seventy acres planted by G. W. Stewart made an average of 32 bushels per acre, and 75 acres planted by R. C. Chase made an average of 29.2 bushels per acre. According to the State Department of Agriculture, these two fields of Turkey Red were the only fields of this variety wheat to pass certification in the State.

Word has been sent out from the office of State Commissioner of Agriculture, J. E. McDonald, that all okra in the Valley must be destroyed by October 1st. This is a further step in controlling the pink bollworm. It has been found that okra acts as a host plant for the pest. The regulation further provides that no plants shall be standing between October 1st and December 31st of each year, and that no ripe pods shall be left on the stalks between January 1st and April 1st.

Sixty-five bushels of good quality peaches were purchased co-operatively through the Harrison county Home Demonstration Council and delivered to consumers in Marshall during a recent month. R. R. Morrison, county agent for Harrison county, bought the peaches from R. H. Key, of Daingerfield, for 60c per bushel delivered in Marshall. A total of $26 was saved by the consumers on this one load of peaches.



Giant four-leaf clover formed on the campus of A. & M. College by 3,000 4-H club boys and girls during the annual Farmers' Short Course.

Texas livestock breeders have sold more than 6,000 herd sires in the State of Louisiana within the past three years, according to official report.

Alfalfa growers in Wilbarger county last year formed an association whereby they could sell certified alfalfa seed. Thirty-nine members recleaned 151,000 pounds of certified seed. Recently the association was reorganized for the 1940 season. Many of the fields have already passed State inspection, and certified seed is ready for sale. Seed will be advertised and sold as the "Wilbarger County Certified Alfalfa Seed."

A group of Houston men are employed in the unusual occupation of sorting Angora goat or mohair wool by their delicate sense of touch alone. They are able to distinguish as many as 15 different diameters of hairs. Their keen sense is known as a "micrometer touch," because their decisions are calibrated regularly with mechanical micrometers by the Bureau of Standards and must be correct. Each worker daily sorts between 400 and 500 pounds of wool, a lock at a time, into various matchings. This sorting shop is the only one of its kind south of New England.

Tomato vines growing from 4 to 7 feet high are being displayed at the home of Elmer Morgan near Dallas. They are reported to be the tallest seen in this section.

Texas Technological College owns the only Holstein cow in Texas on the honor list just announced by the Holstein-Friesian Association of America. This cow, junior 4-year-old Tech Matchless Alcartra, produced 564.8 pounds butterfat in 305 days on four milkings daily.

The Home Demonstration Council in Medina county recently appointed a committee to make arrangements for the co-operative buying of products. It is the duty of the committee to find out what the club women want to buy co-operatively, who has it to sell, and the minimum price for which it can be purchased.

Six-year-old Lena Wallace, of Harlingen, (Cameron county), couldn't have a pony to ride so she trained a calf for her daily trip to the mail box. The calf, less than a year old, has also been taught to see-saw, jump up on boxes, kneel, and carry feed in from the field.

Sixty-nine San Jacinto county farmers have pooled orders for grass and clover seed in the amount of $1,938 for the purpose of improving their range under the 1940 AAA Range Program. Thirty farmers are terracing, mowing, deferring, grazing, and removing brush from their pastures. This makes a total of 99 farms comprising 48,056 acres under the Range Program. The total value of the range payments is approximately $4,500.

Approximately 1,000 acres of soybeans have been planted in Hunt county this year on neutral acres to be used as a hay crop, or in some instances turned under as green manure. W. F. Haden and J. B. Haden, Jr., who live in the northeast corner of Hunt county, where practically all the soybeans are located, started this experimental work some three years ago in an effort to find some satisfactory crop to grow on acres which cannot be planted to soil depleting crops. Their success with the crop has caused many other farmers to adopt the practice.

Mrs. Harry Wendt, of the Palmetal club of Cameron county, added a nice sum to her budget this spring with strawberries, and at the same time provided both fresh and preserved berries for food. "Late in the fall of 1939 I set 3,000 strawberry plants and picked the first quart on February 28. During the season I sold $42.33, ate 90 pints, canned and preserved 32 pints and gave away about 25 pints. I paid $6.00 for the plants, express $2.25, fertilizer $1.20, boxes $2.25. This gave me a profit of $30.63 not including the berries we used at home. I am keeping the berry patch clean this summer, and will reset them in early fall. I expect to raise more and cheaper berries next year," Mrs. Wendt stated.

Win - the GENUINE

FARMALL Way!

Farmall farming is a peaceful mechanization by which American farmers are controlling all their power operations, all their crops, in all the four seasons. The Farmall-M is shown, with 3-furrow Little Genius Plow.

Here is the plucky Farmall-A Tractor doing a fine job of deep plowing in tough sod. This is the tractor that is filling all power needs on thousands of small farms today. With this easy-handling "Culti-Vision" tractor you sit in comfort and see your work.

● Hundreds of thousands of farmers and their sons have found farming much more interesting and profitable since International Harvester announced the *Farmall System of Farming* over 17 years ago. Farsighted owners everywhere have built their success year after year on the practical performance of *genuine* Farmall power and equipment. Many have disposed of their last horse or mule, and their reliance on Farmall has been well rewarded through the years.

Today, more than ever, the Farmall System—sound, modern, up-to-the-minute!—is your safe, common-sense choice. There is no need to experiment with untried principles.

When you choose one of the four new Farmalls you get low-cost power from an overhead-valve engine that is *the envy of the industry*. You get the comfort of "Culti-Vision." You can have easy, quick control of equipment with "Lift-All." You get today's most modern tractor—built by the world's leading tractor builder.

You'll Be Proud to Say, "I OWN A FARMALL!"

All summer long, farmers have wanted more Farmalls than our great tractor factories could build. Be sure—be safe—choose your Farmall now. The International Harvester dealer will deliver it in time for fall and winter work, well ahead of your big spring rush. He will demonstrate whenever you say the word.

Bill Dorries, of Cunningham, (Lamar county), reports growing a cabbage weighing 26 pounds and two ounces, with its roots, out on his farm. When cleaned up, the weight of the cabbage will be approximately 20 pounds or more.

Texans bred more pure-blooded Jerseys and sold more than breeders of any other State the past year, the annual report of the American Jersey Cattle club shows. They are credited with having registered 5,594 animals during the year, and having sold 2,908 head of registered stock. During the past 5 years, Texas has bred 23,752 registered Jerseys, according to the report.

More than $40,000 net has been accumulated by the Southwestern Peanut Growers' Association in 3 years of operation, according to a report of the directors of the annual membership meeting at Gorman, (Eastland county). Part of the money is being invested in an office building, two large storage warehouses and a fertilizer mixing plant. More than 300 members of the co-operative, from peanut producing counties in Texas and Oklahoma, attended the meeting and heard talks by C. E. Bowles, specialist in co-operative marketing for A. & M. College Extension Service; M. K. Thornton, extension agricultural chemist, and W. I. Glass, extension district agent.

"It is usual for fall freshening dairy cows to show higher average price per pound of butterfat than cows freshening in any other season of the year" says G. G. Gibson, assistant dairyman for the A. & M. College Extension Service.

Wood county has produced more than 5,000,000 pounds of cucumbers this year, and Joe Adrian, a farmer living near Quitman, planted two acres of dill on contract and produced more than 11 tons on his plot.

Texas farmers who are growing flax are watching with interest a recently developed farm-sized flax seed chaffer now being demonstrated in California. The machine has a capacity of a ton an hour according to reports.

The National Hereford Show, which will be held at the 52nd annual State Fair of Texas, Dallas, October 5 to 20, will be twice as large as the one held there in 1939, it has been announced by John Henry Dean, superintendent in charge of the show. Premiums offered winners of the show amount to about $25,000.

J. W. Foster, of Weatherford, (Parker county), has demonstrated that spraying pays big dividends. One acre of his peach orchard was sprayed and as a result only 5% of the fruit were culls; all of the peaches were smooth and without insects. The portion of the orchard which was not sprayed yielded 25% culls, and peaches which were not uniformly smooth. The trees were sprayed 4 times at regular intervals. For the first 3 times a mixture of lime and sulphur was used. The last spraying was mixture of arsenate of lead, wettable sulphur, zinc sulphate and lime. The cost was only 1c per tree for material for each spraying. The cost for labor for two hands who did the work was 50c per acre for each spraying.

An East Texas farmer contracts annually with one of the largest food packers to grow 200 acres of asparagus. The packer sends a portable cannery into the East Texas field and packs the asparagus under a nationally advertised name.

The Texas farmer's income for 1940 will be at least the equal of that of 1939 despite a $3,000,000 drop the first half of the year, Dr. F. A. Buechel, University of Texas economic research expert has predicted. The statistician based his forecast on the belief that livestock marketing will pick up during the next six months.

Cowpeas fertilized with triple superphosphate fertilizer by I. S. Echols, of Staff community, (Eastland county), in connection with his whole farm soil building demonstration were judged to be making twice as much vine and seed production as check plots not fertilized when an inspection was made by county agent E. V. Cook, and M. K. Thornton, extension service agricultural chemist. The vines on 30 acres fertlized with 100 pounds per acre were still green and putting on pods, while 12 acres not fertilized were turning yellow and had no new pod growths.

BRYAN, TEXAS

A FIRST-CENTURY "CHISLER"

Here is the story as it appears in Holy Writ:

"And the multitude of them that believed were of one heart and of one soul; neither said any of them that aught of the things which he possessed was his own; but they had all things in common.

"Neither was there any among them that lacked; for as many were possessors of lands or houses sold them, and brought the prices of the things that were sold.

"And laid them down at the apostles' feet; and distribution was made unto every man according as he had need.

"But a certain man named Ananias sold a possession and kept back part of the price and brought a certain part and laid it at the apostles' feet.

"But Peter said, Ananias, why hath Satan filled thine heart to lie to the Holy Ghost, and to keep back part of the price of the land? Thou hast not lied unto men, but unto God.

"And Ananias, hearing these words, fell down and gave up the Ghost.

"And the young men arose, wound him up, and carried him out, and buried him."

This is the story of a first century "chisler" and his sad fate.

And as it was in the days of Noe, so shall it be also in the days of the Son of man. Luke 17:26.

Our Boys and Girls

AUNT MARY, Editor, Route 5, Box 88, Fort Worth, Texas.

WHITHER OUR YOUTH

The boys and girls of America face a world somewhat different from the old order of things. Europe is now dominated by totalitarianism. Standards by which mankind have lived for centuries are swept away. England alone is battling to preserve democratic as against totaltarian rule. There is a wide gap between the two schools of thought. Totalatarian is the desire and opinion of one man ruling the desire and opinion of many. Democracy, on the other hand, lets the people rule, recognizes the right of each individual to have a say in the affairs of government..

I am afraid, we in America have taken our liberty too much for granted. We have permitted the other fellow to "do our thinking," have been lulled into a false sense of security and self-sufficiency. During the next year we will hear much about patriotism, but we must distinguish between "flag waving" and true love of country. God has said, "Not all those who say, 'Lord, Lord,' are my true followers." The same is true of America; not all those who cry, "I love my country," really love it.

However, we can know the true patriot by what he DOES. Is he willing to make sacrifices of his personal comfort for the safety of his homeland? Will he criticise his government, the officials and others in high places only when he can offer constructive criticism? Will he show love and respect for the flag? Will he keep his body strong and mind clean that he might be ready to defend his country against an aggressor? Will he reverence God and hold to the ideals God has set forth in His great book? He will do well who lives by these ideals today.

Love to all,
(Signed) AUNT MARY.

TELL US ABOUT YOUR VACATION

It would be very interesting to know what my readers have been doing during the summer months. I am sure many of you have had grand trips and experiences. Wouldn't it be fun to share those experiences with your neighbor? Of course, by your neighbor I mean all the readers of this page. Send in your letter now about your vacation. We would like to print it on this page. Address Aunt Mary, Route 5, Box 88, Fort Worth, Texas.

Here is a letter from Bennie Maddox, Route 2, Italy, Texas.

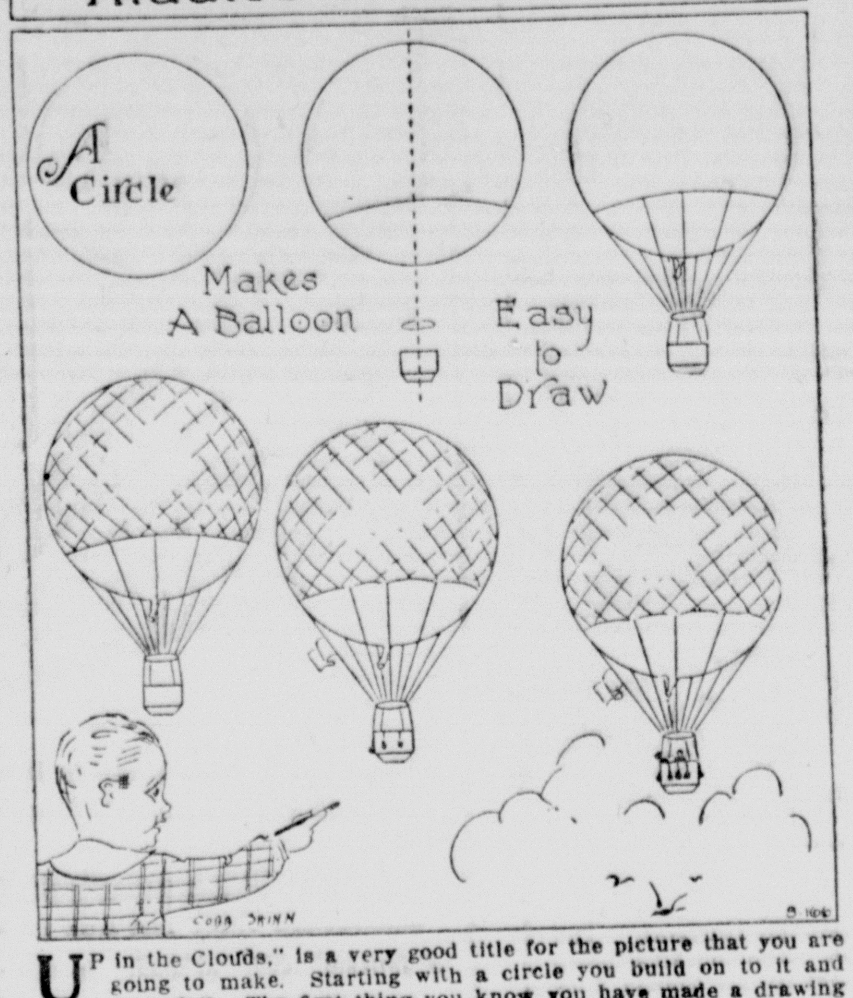
"Would like to tell yau about a trip I took to San Antonio with my brother and his wife. We went there in July. The scenery was beautiful. Going there we bought a watermelon in Austin which we enjoyed very much. On arriving in San Antonio we found a nice place to stay and then went to a show. The next day we visited Randolph Field (one of the largest airplane fields in the United States). We also went to Fort Sam Houston. I thought Breckenridge Park was the most beautiful place I had ever seen. The day we started home we got up early and stopped at New Braunfels for breakfast. As we passed through Austin we stopped and visited the capitol building. We went up to the dome and it was really a beautiful sight. I certainly enjoyed my trip and I was glad my brother took me with him and his wife. I live on the farm and am a girl twelve years old."

Thank you, Bennie, for your nice letter. I am sure your many friends can travel right along with you when and if they read this account of your trip. We are grateful that you were willing to share with us your good time.

I hope to receive many more letters about a trip or some interesting summer experience you might have had at home. Write me real soon.

Kiddies-Can-Do-It

By Uncle Cobb Shinn



"Up in the Clouds," is a very good title for the picture that you are going to make. Starting with a circle you build on to it and around it. The first thing you know you have made a drawing of a balloon. Then add the clouds and birds. If you like, use your water colors and crayons to color it.

FRIENDLY HOBBY CLUB

I am proud that the membership of the club has increased during the summer. We have nearly a thousand members in our Hobby Club at this time. I wish we might have more Charter Chapters in different towns. If you are now a member, send in for plans to organize such a club. It's lots of fun being the President of a Hobby Club and it makes you many more friends. Why not send for this information today? Merely send us the request along with a stamped, self addressed envelope and we will send you full particulars.

Club Rules

1. There are no fees or dues now or at any time.
2. All that is required is for you to fill out the coupon below and mail it at once to Aunt Mary, Route 5, Box 179-B, Fort Worth, Texas.
3. You will receive your membership card, list of instructions and secret code as soon as we get your coupon.
4. You may join as many as three departments, but NO MORE. The departments are as follows: (A) Friendly Correspondence, (B) Sunshine for Others, (C) Stamp Exchange, (D) View Cards, (E) Miscellaneous, (1) Coins, (2) Curios, (3) Souvenirs, (4) Butterflies, (5) Clippings, (6) Books, (7) Postmarks and (8) Magazines.

HOBBY IDEAS

A doll is the oldest and best-loved companion from Toyland. It has also proved to be one of the best liked subjects for collectors. Here are a few suggestion for some unusual character dolls that hobbyists may add to their list.

For a RAG DOLL take a strip of cloth four inches wide and a yard and a half long and toll it fairly snug. This stands for the body. About an inch from the top is tied a thread to make the neck. Above this make a face on the cloth with paints or crayons. Now

(Continued top next column)

Here is a picture of a new member with her pet calf. She is ANNE DAWSON, age 10, of Texhoma, Oklahoma. The name of the pet is Sparkler. Welcome to the club, Anne. Give Sparkler some oats for us.

make four smaller rolls and sewing on two for arms near the neck and the other two on the other end of the body for two legs. The doll is now ready to have her clothes made and put on. On the head sew a mass of black thread raveling which will look like curly hair, especially when a hair ribbon is tied on. Sew a small piece of black cloth on the bottom of the feet to look like shoes.

Clothespins can be very lifelike if handled properly. Make a boy and girl clothespin doll each. Water-color paints will make the faces and also paint the boys' suit of clothes right on the wood of the clothespin. The girl's dress is easily made and fastened to the neck of the clothespin as well as tied in at the waist line. The hat is glued to the top of the pin. A suggestion for Halloween favors would be like the clothespin doll dressed in yellow and black crepe paper.

A witch doll can be cleverly made by taking a candy lollipop for a foundation. Take a piece of medium-weight paper, cut it in circular fashion and tie to the stick a short way down from the end. The paper should come to the end of the candy part and give it balance so as to stand up. On top of the stick put a marshmallow on which has been marked a face with hot chocolate. Make a yellow crepe-paper dress, tying it around the neck and waist. Over this put on a black crepe-paper cape. Tie a few whicks for the broom into a tiny brush and place on a toothpick. Stick this into the front of the dress. The hat should be made of black paper, pointed at the top and with a brim. With small black streamers tie this hat on a marshmallow head. Though this doll is ferocious-looking, she is very good to eat and would make a nice place gift at a dinner party.

LAST GREAT UNKNOWN REGION

Scientists and foresters are getting ready for exploring the last great unknown region of the United States — a region where animals and birds have never laid eyes on a man, where the sun never shines on some of the ground, where shrubs grow so thick it is impossible to walk, and where even crawling is difficult.

No, this wilderness is not buried in the depths of the Rockies—it is scarcely more than an hour's ride from the important cities of Ashville and Knoxville, and only 12 hours ride from Washington. Some 150,000 acres of this virgin forest lie along the boundary between North Carolina and Tennessee in what is now the great Smoky Mountain National Park.

That such a wilderness exists is known to few men, while no man has ever fully explored its depths. A forester who has cruised timber in this jungle estimates that there are 75,000 acres of forest as unspoiled as when Columbus first discovered America.

One hundred different kinds of trees have been found in the park, 150 species of shrubs, 563 different kinds of flowers, 200 kinds of birds, and 35 kinds of animals and reptiles, including deer and bear.

In this jungle are spruce trees 175 feet high and estimated at 600 years old. With the spruce stand hemlocks seven feet in diameter, and beneath these larger trees, birch forms almost a solid canopy, while rhododendron 25 feet tall grows so closely between the trees that passage is impossible to a man without first clearing the way.

The Federal government is now protecting this mountain wilderness against fire, the ax and the hunter. It is also building new roads and bridle paths so that Americans can enjoy the untamed beauty of our newest national park without too much roughing.

Folks looking on this vast expanse of untamed nature can have a better appreciation of the quality of the early American stock; for it should be remembered that the entire United States was such a wilderness 300 years ago, and that the orderly and more or less civilized country we now live in was carved from raw nature.

I can do all things through Christ which strengthened me. Phil. 4:13.

TUNGSTEN

Tungsten is a very heavy, very hard, heat-resisting and acid-resisting metal. In its natural form it is found in two different ores, wolfram and scheelite. One or the other of these ores is produced in Southern England, Brittany, Spain and Portugal; in Rhodesia, China, Japan, Burma and Australia, and in Canada, Argentina, Peru and Bolivia, as well as the United States. Our own deposits are chiefly in Nevada, Colorado, California and Texas.

Although its existence and properties have been known for more than a century, a means of using tungsten was found around 1900. Today the metal plays a vital part in armament manufacture. Because of its ability to lend extreme hardness to steel, tungsten is a valuable ingredient in the breech blocks and riflings of large guns, in armor plating and gun shields and in armor-piercing shells. Its most familiar employment is in the filaments of electric light bulbs and radio tubes, where its efficiency saves consumers millions of dollars annually. Its resistance to heat in electric light bulbs, particularly those of 200- candle power, is a scientific marvel.

Although methods of extracting tungsten from the ore were developed abroad, it remained for an American—W. D. Collidge of the General Electric Laboratories — to make it malleable. His research led to a point where the originally completely unworkable substance could be drawn out to a fineness of one-sixth the diameter of a human hair and with the strength of a copper wire ten times its thickness.

Last year 1,036,708 people visited the State Fair of Texas, the world's largest State Fair. Plans are being made to break this record in 1940.

And take the helmet of salvation, and the sword of the Spirit, which is the word of God. Eph. 6:17.

HOUSEHOLD HELPS

MRS. MARGARET STUTE, Editor, Route 5, Box 179-B, Fort Worth, Texas.

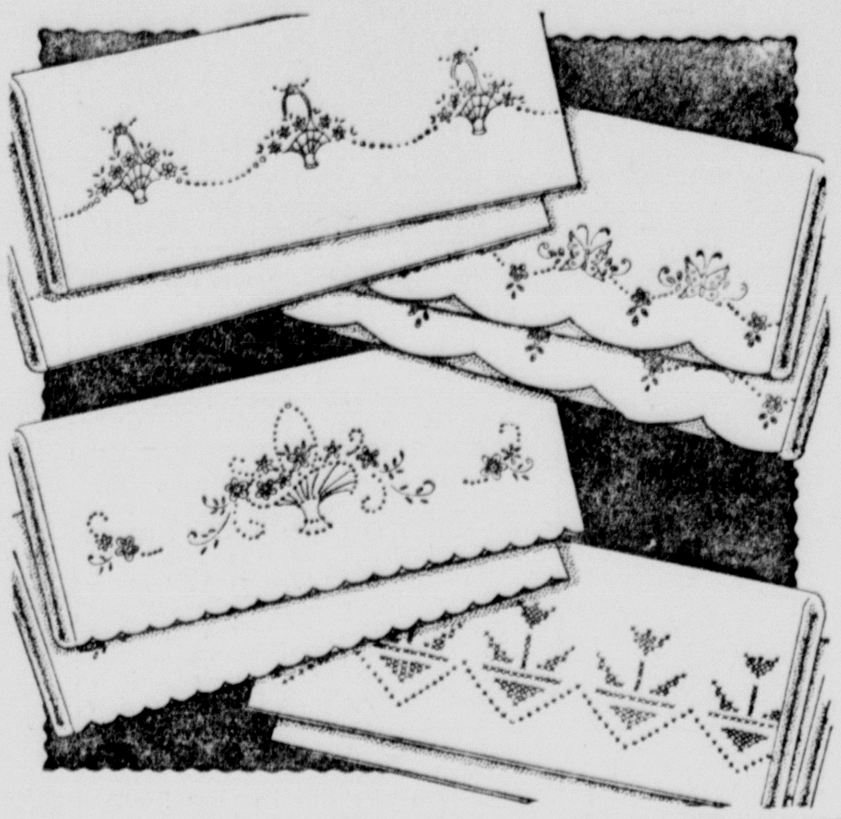
BUSY WOMEN'S WORKBASKET

Practical Pillow Slips

It's fun to embroidery when the designs are as simple and practical as these. If your own supply of pillow slips is low, or if you've need of gifts—NUMO hot iron transfer, C9081, price 10c, is just what you wish. Three dainty flower baskets adorn the pillow slips at the top, a butterfly band provides the next lovely motif, a graceful basket design is on the third pair, and cross stitch tulips give a modern note to the pair at the bottom.

Stamp each design several times — it is easily done from the NUMO hot iron transfer giving these four motifs.

Address all letters to Southwest Magazine, Needlecraft Dept., Box 166, Kansas City, Mo.



INDIVIDUALITY IN STYLE

It is rather stimulating and refreshing to turn our attention from play togs to the formality of luxurious styles developed in fabrics of interesting texture, styles which in their unusualness of line are prophetic of the forthcoming season. Here one finds a fresh play of imagination, thoughts that are untrammeled by the necessities of mass production and, consequently, more of originality.

One of our most original designers has brought to the shops some new styles that are most refreshing. One is the dinner ensemble called "general suit"; another the striped pajama ensemble; and the chartreuse-green gown with a black marquisette overblouse. This designer believes that the home should be a place of gayety. The serious thoughts of the day must be cast aside when one leaves the world of affairs. The woman can establish the tempo of her home by her appearance.

With this in mind she created the pajama ensemble. She topped the turquoise-blue and black full trousers with a daring little blouse of vivid pink, into which she set bands of bright red that cross the shoulders and end at the front in rhinestone-embroidered tabs.

This designer likes to use whaleboning. She stiffens the hem of an evening gown with it and employs it for ribbing in the bodice of a strapless blue moire evening gown. In the "general" suit she bones the narrow white pique belt to give it martial firmness. The chartreuse-green dinner ensemble anticipates the slender sophistication of the coming winter styles. The pipe-slim silhouette is simplified by the chenille-embroidered overblouse with big sleeves.

For many years the smart woman has liked the metal-embossed velvets made in Venice. But their perishability and high price have put them beyond the average purse. This summer new renditions of the fabric have been imported. They are executed in cotton, and in spite of the fact that they are handsomely stamped with metal they are washable. Though these materials do not take their place among inexpensive fabrics, they are less expensive than their luxurious prototypes.

Gowns of these fabrics may be ordered to measure. Some in the more conventional and by now almost classic models are ready-to-wear. They can always be executed in color schemes to comply with individual taste. The pleated, silken sheathes that are worn with straight-hanging coats come over the hips, others are about knee-length—are so soft that they can be crushed in the palm of a hand without damage to their pleated folds.

The lovely creations from coal, milk and many other prosaic materials still hold the attention of the fashion world. They are so good to look at and wear so well, that milady takes to them like ducks to water.

A LIFT TO THE HOUSE

In keeping with today's trend, the period influence has been freely adapted and lightened up. Some of the color schemes are a far cry from yesterday, but they are lovely. One is a rather dark brown wallpaper with its rustic figures in light grayish white, the white taffeta curtains with their narrow valance and the rattan window-shade painted white strike the modern lighter note. Other notes of white have been strategically introduced, as on the frame of the green upholstered daybed, the white leather armchair and the porcelain bases of the lamps with their white shades.

Such a setting brings out to advantage the warm brown of the walnut, which, with lighter fruit woods, is used in provincial places.

The discrimination which home owners exercise in selecting their decorative accessories is now being expressed out-doors in the placing of an old stone fountain against a brick wall or in the forming of a vista at the end of a walk by the use of a marble statue or a bit of modern terra cotta sculpture.

Some new gadgets for the home are interesting and useful as well. An electric platter that keeps food hot, but not enough to cook it, is something for women whose families have haphazard eating hours. If family and guests simply refuse to appear together for breakfast and other meals the cook can fix the egg or whatever, leave the food at the table on this low-heat metal platter and go about her business instead of standing around waiting for each contingent to show up at its own sweet time.

A lucite bath rack is the last word in tub luxury. Made of the clear plastic that looks like glass, but is practically unbreakable, the rack fits across the tub and makes bathing a luxurious pleasure. It has a reading rack, a mirror for soap, make up and brush and comb. This is something for girls who have everything and who need more ways to amuse themselves (one dealer said) but the low cost makes them a great joy to any lass.

Rubber mats with felt disks in the center are

(Continued top of column)

to put under potted plants. The mats come in several sizes to fit under various-sized flower pots. Colors are the same as prevailing colors in flower pots, too—notably clay colors, green or white.

TIPS FOR COMFORT

If oil of cedar or orthodichlorbenzine is placed in a shallow dish and left in a room that is being painted, insects will be kept away.

When linoleum is put down over floors, brass clips at the edges around baseboard and at doorways make a neat appearance.

A bathroom color scheme both artistic and practical has walls painted jade and plumbing fixtures to match. The floor is covered with linoleum in black and cream-colored squares, with black border and inner border of biege to match the shower curtains.

WE DINE

Here are some delicious recipes the family will welcome during the crisp fall days:

Jellied Tomato Soup

4 tablespoons gelatine
¼ cup cold water
1½ cans tomato soup
1½ cups boiling water
Seasoning.

Soak gelatin in cold water 5 minutes. Combine tomato soup with boiling water. Stir gelatin into hot mixture. Add seasoning to taste. Chill in refrigerator until set. Beat with a fork and serve in bouillon cups. Garnish with sliced lemon and parsley. Preparation time, 10 minutes.

Suggested Menus

Here are three menus for dinner. I believe the plan outlined in each menu will help you to plan others as well balanced as these:

MENU NO. 1

Stuffed lamb shoulder (very reasonable in price)
Creamed potatoes
Buttered cabbage
Bread and butter
Hot apple tarts, cream
Milk (children)

MENU NO. 2

Vegetable soup
Scalloped salmon, or fresh fish, pickle
Green beans
Whole-wheat muffins
Fruit-juice gelatin
Drink.

MENU NO. 3

Macaroni and cheese
Baked onions in tomato sauce
Bread and butter
Spiced apples or apple sauce
Lemon-gelatin pudding
Drink (grape juice or milk)

Jelly Glazed Beets

3 cups cooked small beets
2 tablespoons water
2 tablespoons vinegar
⅛ teaspoon salt
Dash of cloves
1 tablespoon butter
¼ cup grape jelly

Combine beets, water, vinegar, salt, cloves and butter. Simmer 5 minutes or until all liquid is taken up, stirring gently to prevent scorching. Add jelly and simmer 10 minutes longer, basting frequently. If large beets are used cut in eighths and measure. Serves 6.

Stuffed Pear Salad

Blend 2 packages (6 ounces) cream cheese, one-eighth teaspoon salt, and 1 tablespoon mayonnaise. Combine ¼ cup mayonnaise with 2 tablespoons red current jelly and chill. Peel 3 fresh pears and cut in halves, lengthwise, hollow out centers and fill cavities with cheese. Place on lettuce. Serve with mayonnaise-jelly dressing. Canned pears may be used. Serves 6.

4-H CLUB ENCAMPMENT AT STATE FAIR

The annual encampment of 4-H club boys will be held at the State Fair of Texas, Dallas, Tuesday, Wednesday and Thursday, October 8, 9 and 10, at which more than 350 prize winners of the 35,000 4-H club members throughout Texas will be guests of the Fair, it has been announced by Frank P. Holland, director in charge of the encampment.

10,000 INSECT PESTS

The government entomologists say there are nearly 80,000 different kinds of insects in North America alone. They have "notes" on more than 20,000 species, of which "at least 10,000 are pests of more or less importance." Heading the list in its destructiveness is the mosquito, charged with depredations of more than $125,000,000 a year. Second is the boll weevil, that chews on the average 2,000,000 bales of cotton a year. The corn earworm is third, destroying nearly $100,000,000 annually of corn, tomatoes and cotton.

THIS AMAZING OFFER OF FOUR COASTERS & FOUR ICED TEA SPOONS YOURS NOW for Only 25¢
